The *Quantum* light management hub provides the ability to control DALI ballasts, Lutron GRAFIK Eye® power panels, GRAFIK Eye® QS, and Sivoia® QS shades from one centralised location.

# Quantum® System Overview

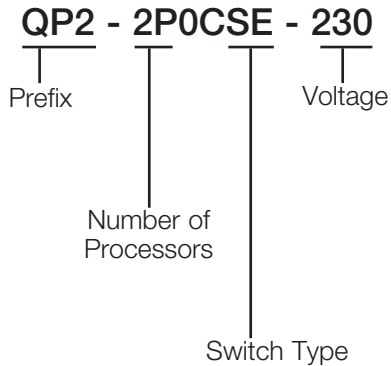

# Hub Overview

# Model Number Guide

## Example

### Prefix

QP2 = Quantum® processor

### Number of Processors

1P = 1 *Quantum* processor

2P = 2 *Quantum* processors

### Switch Type

SE = Ethernet 5-port

### Voltage

230 for 220 - 240 V~

## Available Model Numbers

Contact Lutron for options not listed below.

QP2-1P0CSE-230

QP2-2P0CSE-230

## Additional Ratings

50 / 60 Hz

Output: Processor - 24 V<sup>DC</sup> 1 A per link

## Note:

This panel is rated for Class A, Commercial Use Only.

## QS Device Consumption Rules

The table below lists the devices available on the QS link. See below for each device's count toward the link maximums for switch legs, devices, and power draw. A *Quantum* QS link can have up to 512 switch legs (outputs), 99 devices, and 32 power draw units.

QS Device Description	Switch Leg Count	Device Count	Power Draw Units
3-zone GRAFIK Eye® QS	3	1	0
4-zone <i>GRAFIK Eye</i> QS	4	1	0
6-zone <i>GRAFIK Eye</i> QS	6	1	0
seeTouch® QS	0	1	1
Sivoia® QS Roller 64™	1	1	0
<i>Sivoia</i> QS Roller 100™	1	1	0
<i>Sivoia</i> QS Roller 225™	1	1	0
QS contact closure interface	up to 5	1	2
QS network interface	0	1	2
QS smart power panel	0	1	0
Digital Fluorescent Controls (Energi Savr Node QS™)	up to 128	1	0

# Dimensions

All dimensions in mm.

Top View

Front View

Left Side View

Right Side View

Bottom View

# Mounting and Conduit Entry

## Notes

- Water damages equipment. Mount in a location where the hub and processors will not get wet. Mount within 7° of true vertical.
- A minimum of 305 mm unobstructed space is required in front of and below the hub for ventilation.
- Enclosure: IP-20 protection
- Weight: 20,4 kg
- Surface mount only
- For indoor use only
- 0 - 40 °C
- Relative humidity less than 90% non-condensing

# Mains Voltage Wiring

## Notes

- Mains voltage must enter hub from top right of hub.
- Run a dedicated 220-240 V~ normal/emergency feed.
- Run wiring so mains line voltage is separate from PELV wiring.

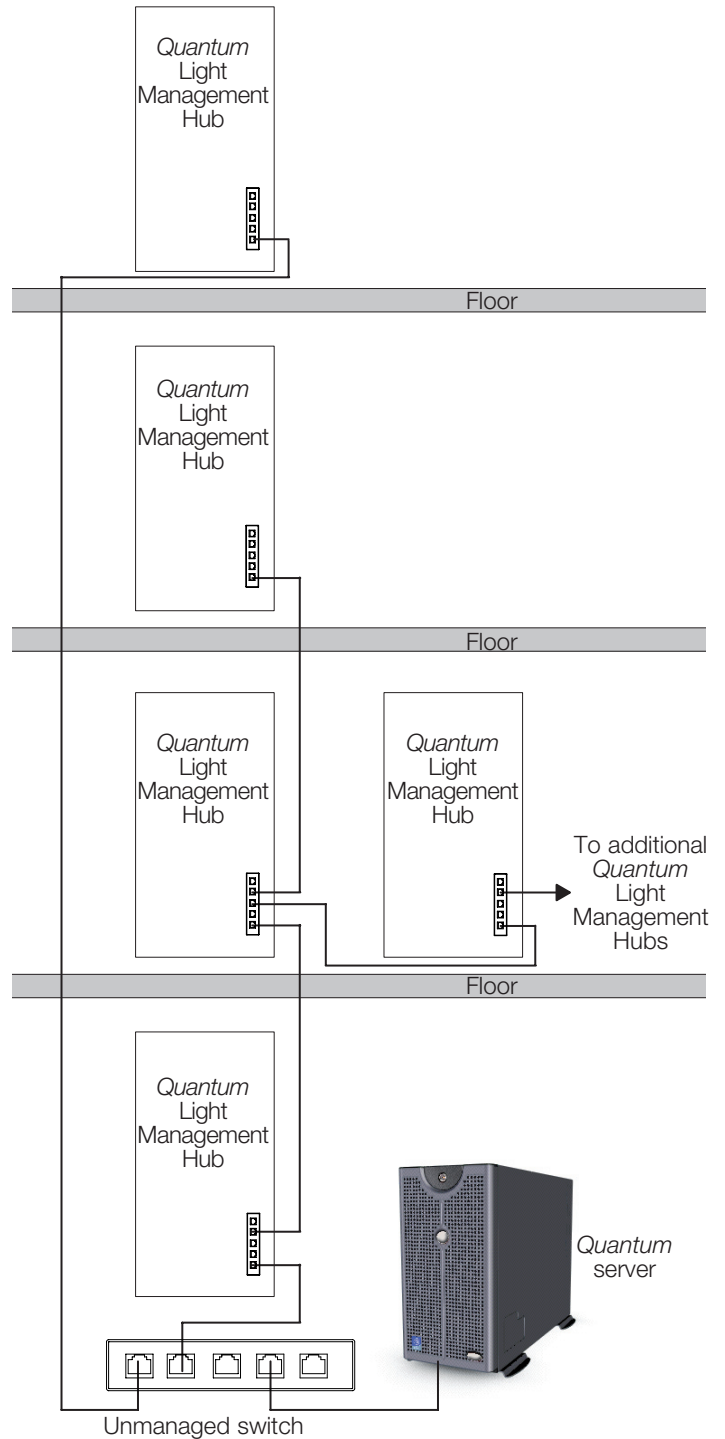

## Wire Sizes

- Power feed (live): 2,5 - 4,0 mm<sup>2</sup>

# Quantum® Ethernet Wiring

## Example of Ethernet Wiring: Riser Diagram

### Notes

- Ethernet wiring is considered PELV; do not run in the same conduit as mains voltage wiring.
- Wiring distance for any single Ethernet data link segment is 100 m max; use switches or hubs for longer distances.
- Processors cannot be more than 6 Ethernet hops away from the server.
- Processors communicate over the Ethernet network using multicast UDP; a dedicated network must be used for the lighting control system.
- Wiring between Hubs on a floor must be installed before startup. Wiring between floors can be added later.

# Configurable Link Wiring: Power Panel Link

## Notes

- Power panel link must be daisy-chained (no T-taps).
- Maximum of 32 power panels per link.
- It is not necessary to have the *Quantum* hub at the end of the link.
- The sense wire (terminal 5) is used whenever there is a panel being supplied by an emergency/essential feed; see power panel instructions for details.
- Each PELV terminal can accept only two 1.0 mm<sup>2</sup> wires. Two 2.5 mm<sup>2</sup> conductors will not fit. Connect as shown using appropriate wire connectors.
- Attach the included ferrite clamp onto the Power Panel link inside the Lighting Hub.
- Total length of control link may be no more than 600 m. If link repeater interface and GRX-CBL-46L cable are used, length may be up to 1 200 m.
- GRX-CBL-46L PELV wiring cable is available from Lutron and contains two 2,5 mm<sup>2</sup> conductors for control power, one twisted, shielded pair of 1,0 mm<sup>2</sup> for data link, and one 1,0 mm<sup>2</sup> conductor for emergency (essential) sense line.

# Configurable Link Wiring: GRAFIK Eye® QS and Sivoia® QS Shades

## GRAFIK Eye QS Link

(Drain wire in shield - Connect together to make one continuously linked shield. Keep away from ground and control electronics.)

Note: Wallstations are powered directly from the light management hub (not the GRAFIK Eye QS control unit)

## PELV Terminal Wiring

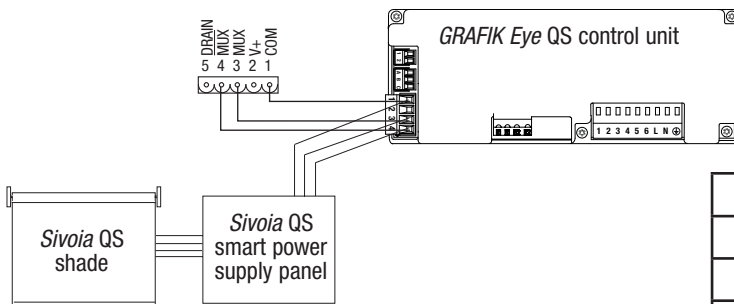

PELV (Class 2: USA) control wiring  
 (2) 1,0 mm<sup>2</sup>  
 1: Common  
 2: 24 V---

Data link: (1) twisted, shielded pair  
 1,0 mm<sup>2</sup>  
 3: MUX  
 4: MUX

## Sivoia QS Shade Link

(do not use the "DRAIN" terminal)

Wire Gauge	QS Link Max. Length
2,5 mm <sup>2</sup>	600 m
1,5 mm <sup>2</sup>	250 m
1,0 mm <sup>2</sup>	150 m

## Notes

- System communication uses PELV wiring.
- Follow all local and national electrical codes when installing PELV wiring with mains wiring.
- Each terminal accepts up to two 1,0 mm<sup>2</sup> wires.
- Total length of control link must not exceed 600 m; If exceeding 600 m, contact Lutron for wiring configuration.
- Make all connections in the control unit's wallbox.
- A Quantum QS link can have up to 512 switch legs (outputs), 99 devices, and 32 power draw units (see page 4).
- Attach the included ferrite clamp onto the low-voltage control wiring inside the Lighting Hub.
- Wiring can be T-tapped or daisy-chained.
- Wire sizes:
  - Two 2.5 mm<sup>2</sup> conductors for control power.
  - One twisted, shielded pair of 1,0 mm<sup>2</sup> for data link.
  - Cable is available from Lutron: GRX-CBL-46L.

# Configurable Link Wiring: Energi Savr Node QS™

## DALI QS Link

(Drain wire in shield - Connect together to make one continuously linked shield. Keep away from ground and control electronics.)

## Activate the System

You have completed your *Quantum* system installation. For onsite factory startup, call Lutron Technical Support and select Startup to schedule a field service visit. Allow for 10 working days between day of call and scheduled visit.
