**Plan Headrail Valance Clip Locations**

2.1 Mark the mounting bracket locations:
- A. Follow the instructions provided with the blind to locate and install the blind mounting brackets at the window.
- B. If the blind is already installed in brackets, it must be removed to install the Headrail Locks and Valance Clips as shown in Section 3.

2.2 Mark the Headrail Valance Clip locations:
- A. Using the pre-installed mounting clips on the valance as a guide, mark each Headrail Valance Clip location on the headrail.

**Install the Headrail Valance Clips**

3.1 Insert headlocks:
- A. At each mark made on the headrail in step 2B, insert a headlock. You may have to press down firmly to engage the headlock’s upper channel (see section view below).
- B. Turn the headlock counterclockwise to position it for the next step.

**Complete the Blind Installation**

4.3 Attach Headrail Valance Clips
- A. All headlock clips, slide a Headrail Valance Clip down over the front and back of the headrail until it sits flush on the top of headlock.
- B. Secure the Headrail Valance Clip with 2 screws provided.

**Add the Valance to the Installed Blind**

5.3 Attach the valance:
- A. Aligning the clips on the valance and on the headrail, slide the valance up in front of the headrail, engaging the clips.
- B. Hang and wire the blind according to the instructions provided with the blind. Verify proper operation and perform all programming to complete setup.
