

Daedalus® Pendant Luminaires Wiring for 220/240/277/347 V~ Applications

Model Numbers:

DPD608M2222UXX*

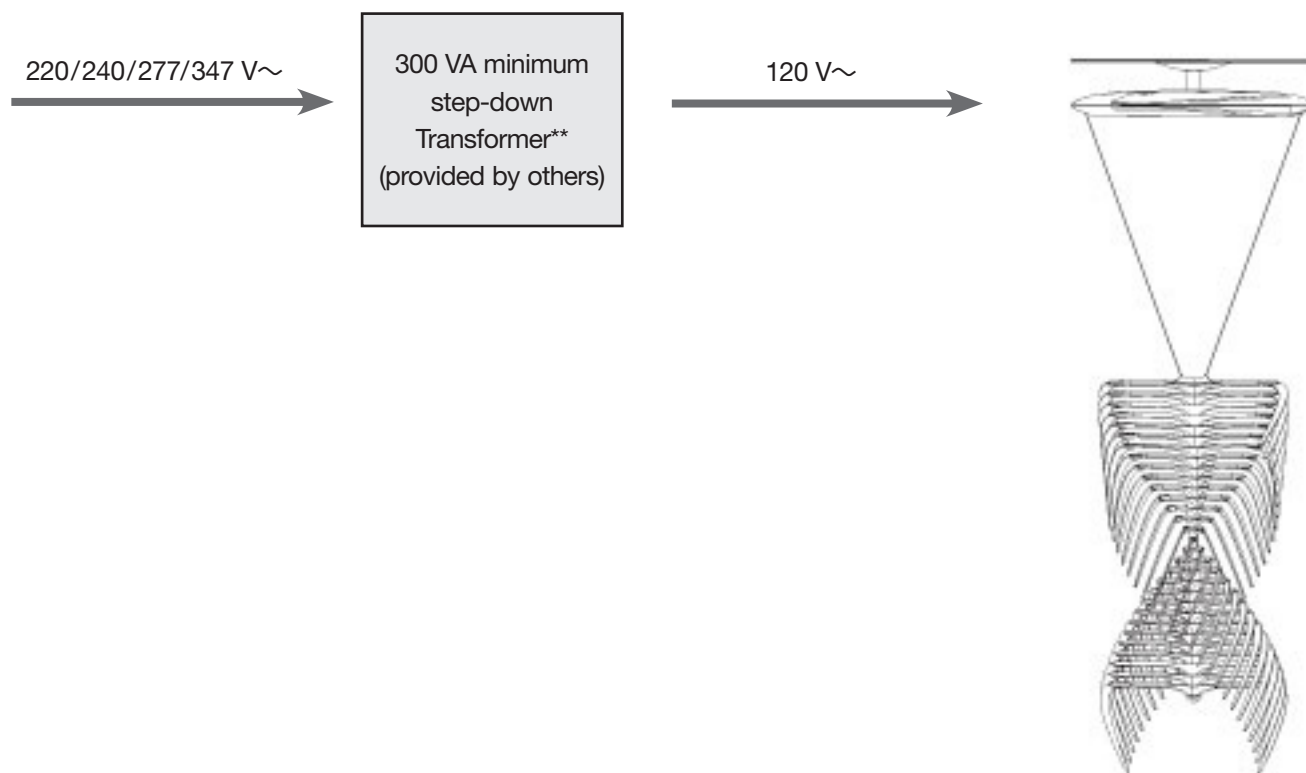

DPD608M2262UXX*

Overview

This document summarizes the information on how to successfully wire the Ivalo® Daedalus® Pendant Luminaires in countries with line voltage greater than 120 V~. Please refer to Daedalus® Installation Guide (P/N 041155) for more information.

Notes:

1. Daedalus® Pendant Luminaires require a 120 V~, 50/60Hz input.
2. In order to install and operate at a voltage other than 120 V~, a 300 VA step-down transformer must be used depending on the input voltage (see diagram).
3. Daedalus® Pendant Luminaires are 160 W maximum per luminaire, dependent on load type. The step-down transformer must be sized correctly per number of fixtures on each circuit.
4. Daedalus® Pendant Luminaires do not utilize a ballast or driver.

* XX is used for the 2 digit color code

** Step-down transformer input voltage must be rated for the input voltage of the Line
