Hanging Drapery Fabric

Pinch Pleat
Lutron recommends a drapery hook setting of 1/2 in (13 mm) from the top of the drape to the top of the hook (hooks not included). This locates the drapes just below the track and prevents it from rubbing on the track. It is recommended that a distance of 1/2-1 in (13-25 mm) be maintained between the bottom of drapery panel and the floor.

Dressing the Drape Around the Drive End

Adjustment of the drapery pin height may be necessary to align these pleats with the other pleats on the drapery panel.
