

System Optimization Visit (LSC-SYSOPT)

Visit by a Lutron Service Representative to evaluate system usage and discuss opportunities to make efficiency improvements that will fit with the current use of the facility.

Visit Summary

- Meeting with a facility representative to agree upon system improvements.
- If purchased as a stand-alone visit:
 - Onsite evaluation of current system usage can include:
 - › Sensor calibration.
 - › Timeclock programming.
 - › Light level analysis.
 - › Sensor layout support.
 - › Training.
 - Lutron may not be able to complete all changes if additional equipment or time is required.
 - If a sufficient amount of time remains in the visit and no additional equipment is required, implementation of approved improvements can begin.

Additional Information

- Will be conducted during normal business hours, unless otherwise noted.
- Quantity indicates the number of one-day visits purchased.
- Facility representative should be present during the evaluation portion of the visit.
- Lutron requires 10 business days notice to schedule an onsite visit.
- Facility will not be obligated to implement improvements suggested.
- Coordination of required attendees is the responsibility of the facility representative.
- Facility representative should secure access to the required areas prior to the visit date.
- A sample checklist to be used during the visit can be provided upon request.
- Should be performed after building is in operation.
