### Controlling Hunter Douglas Silhouette Shades From HomeWorks™ Master Keypads

#### Overview

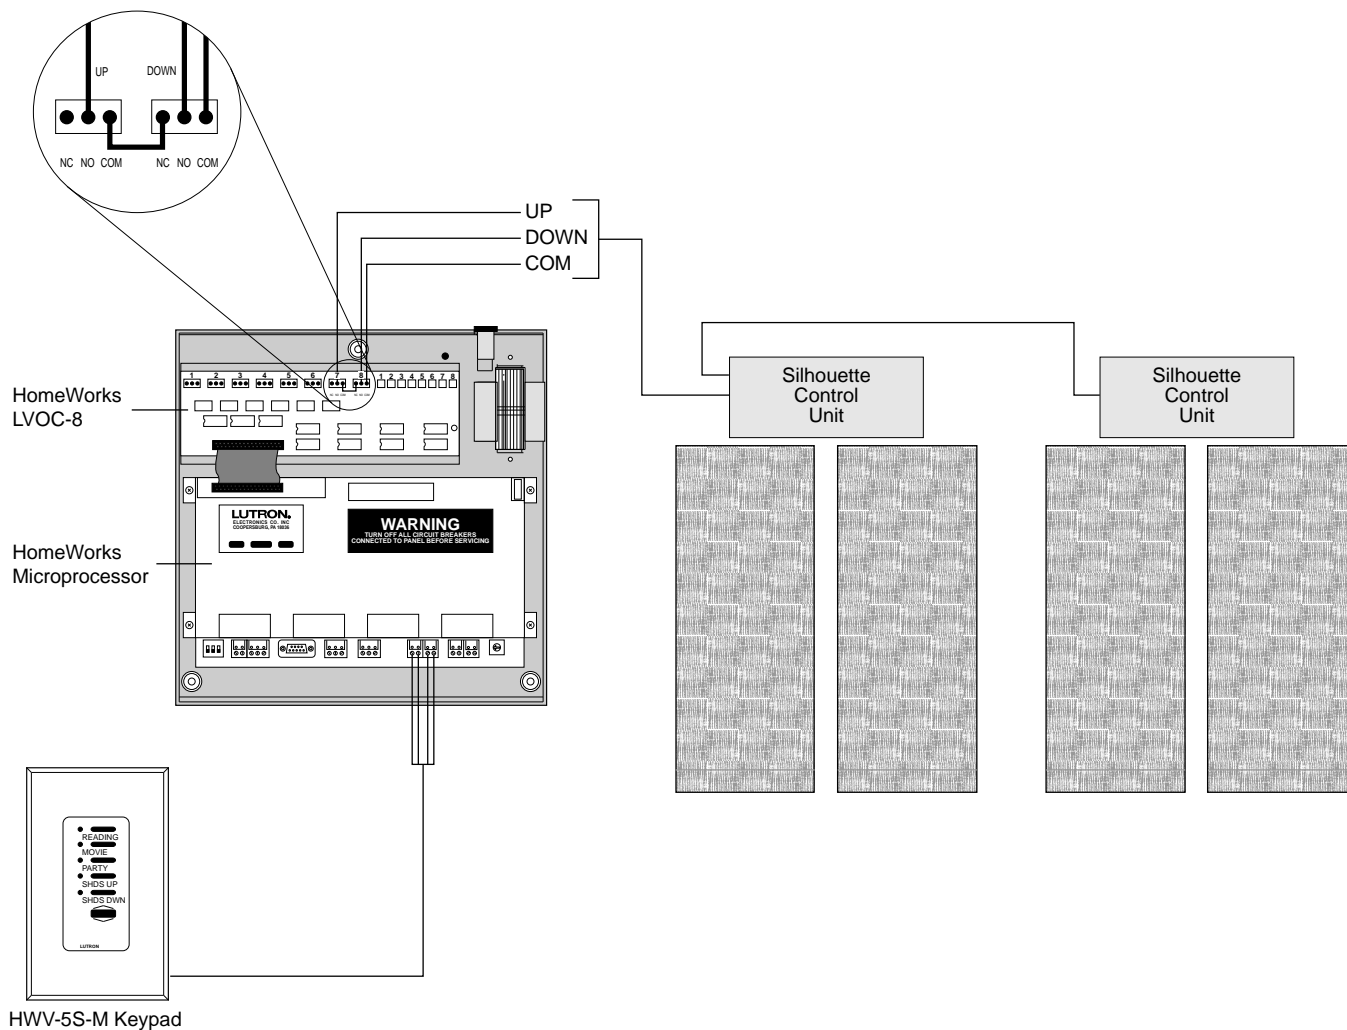

Hunter Douglas Silhouette shades can be controlled from HomeWorks™ master keypads by interfacing the two through the HW-LVOC-8 or NOC dry contact closure relay cards. The dry contact output is fed to the Silhouette control units via their master wall switch connectors.

For information on installation of Silhouette Shades contact the manufacturer at:

Hunter Douglas Silhouette  
One Duet Way  
Broomfield, CO 80020  
1-800-438-3883

#### Wiring

Wire the Silhouette shades to the HomeWorks system as follows:

## Programming Guidelines

To be able to stop the shades at a position other than full up or full down, you need to use two dry contact outputs per shade zone. The LVOC-8 (or NOC) outputs may be programmed (depending on how you want to use the keypad buttons) as follows:

Refer to programming information in the HomeWorks binder.

- 1. One or two buttons with only full up and full down control.** Program one output as a latching closure with the toggle function.
- 2. Two buttons with the ability to partially close.** Program each button to a separate output. Define buttons as maintained function. When either button is pressed, the output closes and the shade moves. When the button is released, the output opens and the shade stops.
- 3. Three buttons used: "Up," "Down," and "Stop."** Program the "Up" button to turn the "Up" relay on and the "Down" relay off. Program the "Down" button to turn the "Down" relay on and the "Up" relay off. Program the "Stop" button to turn both relays off.
