

VIERTI

single-touch dimmer

Introducing Vierti™

Vierti ('ver-tē) combines minimalist style and intuitive functionality in a remarkably innovative dimmer.

Lutron set out to create a lighting control that was easy to use, on the cutting edge of design, and maintained Lutron's high standard of quality. The result? Vierti. With a sleek aesthetic, Vierti redefines the style and function found in today's lighting controls.

Vierti's distinct, polished look complements both commercial and residential applications. In addition to a sleek aesthetic, Vierti performs like no other lighting control. The perfect light level can be set with a single touch or a slide of the finger. The LEDs in the illuminated control bar brighten when touched, filling the bar to show the light level selected.

Discover Vierti's benefits – style, versatility, customization – and experience a new dimension in lighting control.

style

Vierti™ combines both classic and contemporary elements for a sophisticated appearance that works with any application. Its clean lines and smooth texture blend with furnishings and architecture to create a minimalist presence, adding the finishing touch to a space.

The Vierti dimmer and wallplate shown here in a light almond matte finish is an understated, yet refined addition to any room. The LEDs are glowing at their brightest intensity, indicating they're "in use."

versatility

Whether you are designing a commercial or residential space, Vierti's minimalist style blends perfectly with any room's decor. Vierti's product line, which includes dimmers, switches, and coordinating accessories, can accommodate most common load types making it even easier to specify a whole-project solution.

Accentuate a room's contemporary design with a Vierti dimmer and wallplate in a stain nickel metal finish. Here, the LEDs are glowing softly, having dimmed from "in use" to "at rest."

customization

Vierti™ offers an unprecedented level of choice and flexibility. With LEDs available in blue, green, or white, and over 21 architectural style wallplate colors and finishes, it's possible to specify a look to complement just about any commercial or residential décor.

A Vierti dimmer and wallplate in black is a tasteful room accessory. Here, the soft amber LED indicates that the lights are off.

touch for maximum brightness

LED's indicate light level
(shown at 75%)

touch for minimum brightness

touch for on and off

Full-featured multi-location dimming

Change and determine the light level from any location in the circuit.

Precise lighting control

Vierti's illuminated control bar is longer than on most standard dimmers. This bar provides better resolution between minimum and maximum brightness, making it easier to set the perfect light level with a single touch.

Audible feedback

When touched, audible feedback confirms that touch.

Locator light

LEDs act as a subtle locator light and can be adjusted to the preferred level of brightness.

Advanced programming

Vierti comes with advanced features including **adjustable high end for energy savings**, **light level fade times** and **LED intensity**. For more information on advanced features please visit www.lutron.com/vierti.

Vierti's adaptive LEDs brighten when touched to indicate the dimmer is responding, then glow softly when at rest. While at rest the user can still easily identify the room's light level, without the LEDs being fully illuminated.

**In use**

When touched, the LEDs glow at their brightest intensity.

**At rest**

The LEDs dim after the light level has been set.

**Off**

When the lights are turned off the LEDs act as a subtle locator light. The amber LED indicates the lights have been turned off.

quality

- Lightning strike surge protection – protect your dimmer from power surges during a storm or from within the building
- Electrostatic discharge protection – designed to withstand the static discharges (static shocks) common in a dry climate
- Air gap switch – easy to use Front Accessible Service Switch (FASS) to completely disconnect power from the load for service
- Square law dimming – LED position matches the perceived light level
- Power-failure memory – lights always return to the previous state when power is restored
- Precise color consistency – color variations are monitored to ensure that all visible plastic parts have a consistent color ($\Delta E \leq 1.0$)
- Smooth and continuous dimming – flicker free continuous lighting control

how to order your product

matte finishes – select the model number, select the LED color, select the wallplate color

model	LED color	product color	finished model number
VT-600M-	B	WH	VT-600M-B-WH

metal finishes – select the product model number (we suggest black) and metal finish wallplate

model	LED color	product color	finished model number
VT-600M-	B	BL	VT-600M-B-BL
VTW-1-		SN	VTW-1-SN

incandescent/magnetic low voltage dimmer

single pole	600 W/VA	VT-600-	
single pole/ multi-location	600 W/VA	VT-600M-	
single pole/ multi-location	1000 W/VA	VT-1000M-	

electronic low voltage dimmer

single pole/ multi-location	600 W	VTELV-600M-	
--------------------------------	-------	--------------------	---

fluorescent (Hi-lume®, Compact SE™, Eco-10™, and EcoSystem™ ballasts)

single pole/ multi-location	120/277 V / 6 A	VTF-6AM-	
--------------------------------	-----------------	-----------------	---

electronic switch

incandescent, MLV, ELV, non-dim fluorescent ballasts, general purpose fans:

single pole/ multi-location	6 A light/3 A fan	VT-S6AM-	
--------------------------------	-------------------	-----------------	---

companion controls

provides multi-location dimming/switching from up to four additional locations:

multi-location companion dimmer	VT-AD-
