

Lyneo™ 0–10 V Fluorescent Dimmer

Energy savings through control of 0–10 V dimmable fluorescent ballasts

AN INNOVATIVE FLUORESCENT DIMMER DESIGNED FOR OPTIMUM CONTROL

Product Details

LYNEO 0-10 V PRESET DIMMER

- on/off button enables user to turn the lights on to a preset light level quickly and easily
- select light level with slider—slide up to brighten, down to dim
- for 0-10 V dimmable fluorescent ballasts, 2 way
- rated for maximum 20 ballasts/40 mA control current
- requires an external non-latching (monostable) relay with a coil rated for 250 V and 30 VA max by another manufacturer

LYNEO 0-10 V SLIDER DIMMER

- select light level with slider - slide up to brighten, down to dim
- for 0-10 V dimmable fluorescent ballasts
- rated for maximum 20 ballasts/40 mA control current
- requires mains voltage occupancy sensor by another manufacturer to power ballasts

Benefits

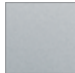

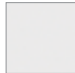

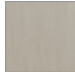

SAVE ENERGY

- controls 0-10 V dimmable fluorescent ballasts
- dim for additional energy savings

ENHANCE DESIGN

- enables users to coordinate a fluorescent dimmer with other Lutron controls in their design
