

GRAFIK Integrale

Preset Lighting Control | Easily create the right scene with any light source

An excellent solution for both residential and commercial applications. Save energy and enhance the look, feel, and flexibility of any room with GRAFIK Integrale.

GRAFIK Integrale features

A single control unit replaces multiple dimmers or switches, providing a beautiful, easy to use solution in any room with multiple lighting zones.

Adjust fade rate between lighting scenes, and control of any light source with smooth, flicker-free dimming.

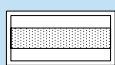

Easily expand at any time by adding accessory wallstations for convenient lighting control from anywhere in the room.

Works with any control type

- Leading edge
- Trailing edge
- 0–10V
- DALI broadcast only
- Switching

Works with any light source

(control multiple sources on each control)

LED

Incandescent/
halogen

CFL

Fluorescent

Magnetic
low voltage

Electronic
low voltage

Typical applications

Control all the lights in a room from a single location. Easily set and recall favourite or commonly used scenes.

Hospitality — Ideal for cafés and restaurants to give the manager simple access to all the lighting in the space.

Retail — Ideal for store fronts, to give the manager simple access to all the lighting in the space.

Commercial — Ideal for multi-use spaces, such as private offices, boardrooms, and lobbies. Preset scenes take the guesswork out of lighting control.

Residential — Ideal for any room with multiple lighting zones, including master bedrooms, living/family rooms, and dining rooms.

Easy to program, easy to install

- Simply adjust zone intensity button to set lighting for any activity, save as a preset scene, then recall with the touch of a button.
- One unit controls all light sources and switching loads.

LED Control Centre of Excellence

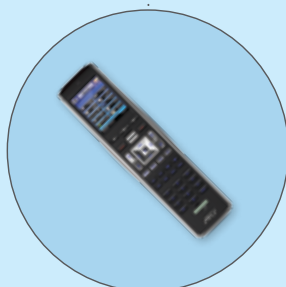

Through the LED Control Centre of Excellence, we test LEDs on a continued basis for compatibility with our controls and drivers. Lutron products also simplify the use of LEDs and ensure a high quality dimming performance.

Accessory wall stations

Create the perfect environment

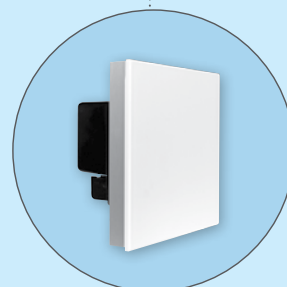

Lutron offers stylish low-voltage keypad to enhance the beauty of any space and control lighting from more than one location.

Wireless remote control

Add flexibility

Use optional wireless remote control with built-in infrared receiver to select scenes from anywhere in a room.

Power boosters

Increase power

Increase individual zone capacities in larger spaces with Lutron power boosters.
