INTUITIVE OPERATION

FLEXIBLE CONTROL

Buttons provide scene/zone status, are equally sized, and are fully programmable.

BACKLIT, ENGRAVED TEXT

Scene and zone descriptions are backlit, and engraved directly on faceplate providing subtle elegance and also acting as a nightlight.

Please note: Grafik T keypads are not available in Architectural Metals and cannot be ganged with other Grafik T controls using Architectural Metals.

DYNAMIC BACKLIGHTING MANAGEMENT

Backlight intensity is automatically adjusted in real time so buttons are easy to read in any light.
Meet the family

| HYBRID KEYPADS | • Residential system control that allows multiple lighting zones to be dimmed from a single location to create scenes (i.e. Welcome, Entertain, Away, etc.)  
| | • Flexible design contains an integrated C·L dimmer to control a local zone as well, ideal for retrofit applications  
| | • Can also be used exclusively as a wireless keypad (load optional)  
| Note: Hybrid Keypads are only available in Architectural Matte and Glass finishes  
| DIMMERS | • LED lightbar with responsive touch interface provides users with one-touch control  
| | • Phase selectable and C·L technology provide superior performance and flexibility for today's LED light sources  
| | • Pair with wireless sensors and remotes for convenience and code compliance (Clear Connect models only)  
| SWITCHES | • An elegant on/off control. Use the toggle button or LED lightbar to toggle the load  
| | • Use for general lighting, fan, and small motor loads  
| QS SLIDERS | • Wired QS device that works in a Quantum or HomeWorks QS system to control all load types, including third-party devices  
| | • Can be assigned to control any single zone of lights in a system |
