Alena Pull-to-Start Drapery Track

Putting control in your guests’ hands

Elegant, silent, smooth operation — available as a standalone solution or seamlessly integrated with Lutron lighting and guestroom control systems.
Lutron’s Alena Pull-to-Start Drapery Track is designed with guests in mind — whether for hospitality, commercial, or residential applications. Guests can press a button or gently tug on the fabric to open or close the system. A keypad will also allow the drapery to stop midway to provide the desired amount of daylight or darkness.

The drapery track installs easily as a plug-and-play solution, with no programming necessary prior to use. Alena drapery tracks provide Lutron’s distinctive smooth performance and utilize Lutron’s ultra-quiet, low-voltage drive.

System Integration

- Standalone drapery solution, perfect for guestrooms and multi-dwelling units (MDUs)
- myRoom plus Quantum Homeworks QS
- myRoom prime Homeworks QS RadioRA 2 RA2 Select

Communication

- Contact closure
- QS wired communication
- QS wireless with ultra-reliable Clear Connect technology

Controls

- 3rd-party contact closure keypads
- Palladiom seeTouch Pico wireless

Power Supply

- 35V Individual Plug-in

Styles

- Ripplefold Pinchpleat

Manual Override

- Pull-to-start

Power

- 24-36 V DC

Track Colors

- White Bronze Silver

Maximum Track Length: 216” (5.49 m)

Minimum Track Length: 24” (0.6 m)

System Capacity

- Ripplefold: 45 lbs Pinchpleat: 80 lbs

Mounting Brackets

- Ceiling Recess

Configurations

- Left Draw Center Draw Right Draw
Drapery Fabric Panels

With Lutron, you have the freedom to work with the drapery work room of your choice to construct the fabric panels you envision. In order to help achieve the desired soft fabric aesthetic, the Alena drapery track is offered in the two main styles in the industry — ripplefold and pinchpleat — with multiple options for fullness.

**Ripplefold Style**
Fullness determined by the string length between auxiliary carriers and the total width of the fabric panel.

- **80% Fullness**
  Panel width = system width + 80%

- **100% Fullness**
  Panel width = system width + 100%

- **120% Fullness**
  Panel width = system width + 120%

**Pinchpleat Style**
Pinchpleat drapery panels are offered at 3 fullness ratings:

- **3x:** panel width = system width x 3 (sheer fabrics only)
- **2.5x:** panel width = system width x 2.5
- **2x:** panel width = system width x 2
