**Wiring**

Make sure to choose your fan control based on the type of wiring in your backbox.

*2-wire*
Single wire for both fan and light

*3-wire*
Separate wires for fan and light

**Fan Limiter**

Some fan/lights have a limiter. Please note that Lutron fan controls with a dimmer may not perform as intended when used with a fan/light with a limiter.

**Direct Current (DC) fans**

Although most fans are alternating current (AC) fans, some newer fans are available with DC. Please note that Lutron fan controls are not designed to control DC fans.
### Lutron fan control selection guide

### Dim your LED lights & adjust fan speed from one wall control. Eliminates the need for pull chains.
- C-L dimmer for LEDs and incandescent/halogen bulbs
- 4-speed fan control
- Available in 26 colors
- Single pole; no neutral wire or canopy module required

Note: Separate wire required for fan and light.

### Did you know?
**Lutron C-L dimmers:**
- Don’t require a neutral or special wire temperature rating
- Take the hassle out of low-end adjustments
- Use patented technology to prevent dimmer interaction and minimize flicker, for beautiful LED dimming

*Requires separate wires in the backbox for fan and light—see “Wiring” section*
