

Lutron Accessory Wallplates

Lutron accessory wallplates offer a carefully matched Palladiom aesthetic — front view and profile — with your keypad stations. These wallplates are the ideal choice when installing Palladiom Keypad stations near accessory controls/sockets. For the best visual aesthetic, we recommend a *spacing of 19 mm between the wallplates*.

Gangs* and Openings

A:** International Accessory

* Palladiom accessories do not gang with other devices of different sizes (e.g., Palladiom keypads, Palladiom thermostats, Maestro controls, or GRAFIK T controls).
 ** Repeat the letter designation "A" (3 maximum) for each opening (e.g., 2-gang = AA, 3-gang = AAA).

Sockets

Personalising controls and accessories in your home or commercial space is easy with the versatile Lavina 95 socket offering from T&J Electric. Available sockets include plug modules, telephone, data, TV jacks, HDMI and USB chargers, and many others, for a wide variety of markets and voltages. For the complete selection, contact your local distributor or T&J Electric.

Please note that some accessories do not fit inside the Lutron wallplate (e.g. shaver socket). Contact T&J Electric to evaluate custom applications.

Lavina Wallplates by T&J

For a value option, in areas where accessories are not installed near Palladiom wallstations, T&J offers Lavina wallplates. Lavina wallplates provide a coordinating look, but do not offer a guaranteed match to the Palladiom aesthetic.
