myRoom prime

Simple design of light, temperature, and blind control for energy savings and guest convenience
**myRoom prime Benefits**

**Enhance the Guest Experience**
- Lighting turns on automatically when guest enters room
- Switches are labeled with easy-to-understand icons
- Industry-leading presence detection saves energy when guest is away
- Master OFF switch at bedside and entry for convenient control
- Smooth and continuous dimming with most LED lighting

**Energy Savings up to 30%***
- Thermostat switches to economy mode, lighting turns off when room is empty
- Temperature returns to the guest setpoint upon return

**Lower Total Cost of Ownership**
- Wireless keypads eliminate wiring and installation cost
- 10-year battery life means less maintenance
- Wireless controls allow for lower-cost room re-configuration

**Highlighted Control Stations**
- **Entry Pico**: Master control at entry means guests can quickly turn the lights on or off
- **Bathroom Pico**: Predefined scenes mean guests can select the appropriate light level for their needs
- **Bedside Pico**: Bedside control means a guest has all essential functions within easy reach of the pillow

- Additional control, HVAC, and blind design options [available](#)

**Suggested Solution**

**Panel enclosure**

**Load controllers (wired)**

**Relay signal output to receptacle controller**

**Door contact input**

**Low voltage wiring**

**Room thermostat by Lutron or third-party thermostat with setback signal input**

**Pico wireless control**

**CCO**

**Wireless occupancy sensor**

**Lutron wireless receiver**
