	90W	PSB38-BW30	Par38 connected bulb 	

Hubs also available in select kits.
 Any bulbs other than the ones listed may not be compatible.

* **Wink hub required**

The Lutron® Connected Bulb Remote Control provides a means of adjusting the light level and is independent of the bulb's performance. Some connected bulbs have the ability to receive firmware updates via a hub or bridge, which may affect how the system functions. Contact the connected bulb manufacturer with any questions on the bulb performance.
