Caséta Wireless In-Wall Switch

The Caséta Wireless In-Wall Switch provides switching of multiple load types and, when paired with Pico remote controls, allows wireless control from anywhere in the space.

The Caséta Wireless In-Wall Switch uses Lutron patented Clear Connect RF Technology which enables wireless communication with Pico remote controls, Caséta motion sensors, and the Lutron Smart Bridge and Smart Bridge PRO.

1. No neutral required.
2. “XX” in the model number represents color/finish code.
3. To ensure proper operation of the switch with LED, fluorescent, and ELV loads, a LUT-MLC may be required, especially at lower wattages. If the status LED on the switch is flashing or solid red in color, a LUT-MLC must be installed. To guarantee best performance, installing a LUT-MLC with these load types regardless of wattage is recommended. Raresly, some load types may still flicker or glow in the off state even with the LUT-MLC installed, in which case a different load may be required.
4. See “Ganging and Derating” section.
5. Neutral required.
Specifications

Regulatory Approvals

- cULus Listed
- NOM Certified
- FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules
- Industry Canada Certified
- IFTEL Certified
- NEMA 410

Power

Operating voltage:
- PD-5WS-DV: 120/277 V~ 50/60 Hz
- PD-6ANS: 120 V~ 50/60 Hz

Key Design Features

- Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Switches always operate locally and do not require system control.
- Power failure memory: should power be interrupted, the control will return to its previously set level prior to the interruption when power is restored.
- Uses conventional 3-way wiring.
- Uses Lutron Claro wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately.
- Lutron Claro wallplates snap on with no visible means of attachment.
- Requires a 1-gang U.S. wallbox. 3½ in (89 mm) depth recommended, 2¼ in (57 mm) depth minimum.
- Green status LED.

System Communications and Capacity

- The Caséta Wireless In-Wall Switch communicates with Pico remote controls, Caséta motion sensors, and the Lutron Smart Bridge/Smart Bridge PRO through radio frequency (RF).
- The Caséta Wireless In-Wall Switch must be located within 60 ft (18 m) line-of-sight or 30 ft (9 m) through walls of a Lutron Smart Bridge, Smart Bridge PRO, or Caséta Wireless Repeater.
- The Caséta Wireless In-Wall Switch must be located within 60 ft (18 m) line-of-sight or 30 ft (9 m) through walls of Pico remote controls or Caséta motion sensors (with no Smart Bridge installed).

Device limits

- Pico remote controls and Caséta motion sensors: up to 10 devices (total) may be paired to each Caséta Wireless In-Wall Switch (with no Smart Bridge installed)
- Smart Bridge or Smart Bridge PRO system: up to 75 total wireless devices (Caséta Wireless dimmers/ switches, Pico remote controls, and Caséta motion sensors) are supported per system. Smart Bridge or Smart Bridge PRO counts as one device. The Caseta Wireless repeater counts as one device.

Environment

- Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0% to 90% humidity, non-condensing. Indoor use only.
Operation

### Dimensions

**Front View**

- 2½ in (75 mm)

**Side View**

- 4½ in (119 mm)
- 5/16 in (8 mm)
- 1½ in (30 mm)

### Ganging and Derating

When ganging with other switches in the same wallbox, derating is required. See “Load Type and Capacity” chart.

- Each switch has inside fins removed
- Middle of ganged switches has all fins removed
- Do not remove outside fins on ends of ganged switches

PD-6ANS

![Diagram for PD-6ANS]

1 When using controls without a mechanical 3-way switch, cap the blue terminal. Do not connect the blue wire to any other wiring or to ground.

2 A LUT-MLC ensures proper function when LED, fluorescent, or ELV loads are used. Install the LUT-MLC inside a load fixture or in a separate junction box within the circuit.

3 The red wire must be connected to the load and the black wire must be connected to Line/Hot. The switch will not work if the wires are reversed.
