

myRoom™ Virtual Server by Others

The myRoom™ software may be installed on a virtual server image provided by the customer’s IT department.

During system start-up, the certified Lutron field service engineer will install the myRoom™ software and any supporting software on the virtual server image. Supporting software may include but is not limited to Lutron specific applications, diagnostic tools or virtual machine images. The customer’s IT department staff must be available on-site to assist with this process.

The virtual server is dedicated for Lutron® myRoom™ software only.

Software Required

- Microsoft® Internet Information Services (IIS) 7 or later
- Microsoft® Internet Explorer® 9 or later
- Microsoft® .NET Framework 3.5
- Microsoft® .NET Framework 4.5.1

Supported Operating Systems

- Microsoft® Windows Server® 2012 R2 (64-bit)

Auto Restart Recommended

- Server should be configured to automatically restart when power is lost so it does not remain off when power is restored.
- Data recording is not active while the server is powered off.

Minimum Hardware Configuration Required

- Quad Core Intel® Xeon® processor (4 CPU)
- 8 GB RAM
- 250 GB hard drive
- Two (2) 100 Mbps Ethernet network interfaces
 - One (1) Ethernet network interface will be used for communication to myRoom™ panels.
 - One (1) Ethernet network interface will be used for communication to corporate intranet, allowing access for administration and client PC.

Note: Only one (1) Ethernet network interface is used if all myRoom™ panels and client PCs are on the same network.

Microsoft, Internet Explorer, and Windows Server are registered trademarks of Microsoft Corporation in the United States and/or other countries.

Intel and Xeon are trademarks of Intel Corporation in the U.S. and/or other countries.
