

Overview

The ability to master GRAFIK Eye Control Units can be accomplished using the NTGRX-4M. The NTGRX-4M has five assignable buttons. Each of the first four buttons can be assigned to turn from one to eight GRAFIK Eye Control Units on to Scene 1 and OFF. The fifth button can be used to either turn the GRAFIK Eye Control Units "ON only" or "OFF only."

Applications

A typical NTGRX-4M Accessory Control would have buttons one through four set up with one GRAFIK Eye Control Unit per button and the fifth button set up to turn all four Control Units off. Anytime a GRAFIK Eye Control Unit is ON the LED next to that button on the NTGRX-4M Accessory Control will be illuminated. A typical home system would have an NTGRX-4M control at each entrance and one in the Master Bedroom. When entering or exiting the home, the NTGRX-4M can be used to turn ON or OFF lights throughout the home, or check each Control Unit's status for security. The NTGRX-4M could also be used in the Master Bedroom for similar functions but different GRAFIK Eye Control Units.
