

GRAFIK Centralized Lighting Control Remote Control Hardware License

This software key is a block of 5 additional seat licenses to allow multiple location control of the *GRAFIK* Centralized Lighting Control system. Each location is a registered (licensed) computer that can have multiple users.

The terms 'client license', 'seat license', 'remote control hardware license' and 'user license' all refer to this software.

Control of the access of each user on each computer can be limited by an administrator. If more than one administrator is requested, an Administrative License can be purchased separately (one per each EL-SFT-CLIC-5).
