

## GRAFIK 6000® System

The system is a fixed combination of products that includes the following:

- DesignIT™ and ControllIT™ Software (EL-SFT-DES and EL-SFT-CON)
- One G6000P Central Processor Panel (G6-AR-W000-0-xxx) with the following:
  - 512 total zones
  - Three Control Station Device Link inputs for up to 32 Control Station Devices each (96 total)

It should be noted that this package does not include other hardware or software that must be purchased separately, such as:

- Power Panels
- Control Station Devices
- Computer

It should also be noted that customized combinations of many more options are available in GRAFIK Centralized Lighting Control Systems. This particular combination represents the capabilities that many customers are familiar with as the GRAFIK 6000® System.

More details are available in the Specification Submittal documents of each individual product.
