

## GRX-CIR-WH Ceiling-Mounted Infrared Receiver

### Description

- Allows user to adjust lighting using a hand-held Wireless Remote Control when Control Unit(s) are located in a different room or area.
- Scene selection functionality can be selected in the field.
- Raise/lower button on GRX-IT and GRX-8IT Wireless Remote Controls brightens or dims all lighting in the selected scene.
- Reception range: 360°, 50 ft. (15m) line-of-sight.
- Mounts in metal collar provided by Lutron.
- Works with GRAFIK Eye 3000 and 4000 Series Control Units.
- Selects scenes in just one Control Unit or a group of up to eight Control Units.
- Counts as one of 16 maximum Wallstations and/or Control Interfaces.

### Field Selected Functionality

## Specifications

### Power

Low-voltage Class 2 (PELV)  
 Operating voltage: 12/24 V Direct Current.

### Key Design Features

Meets IEC 801-2. Tested to withstand 15kV electrostatic discharge without damage or memory loss.

### Working Range

360°, 50 ft. (15m) line-of-sight reception range.

### System Communications and Capacity

- Low-voltage Class 2 (PELV) wiring connects the Ceiling Receiver to Control Units and other components.
- Up to 8 Control Units and up to 16 total Wallstations and/or Control Interfaces may be linked for a total of 24 control points.

### Environment

32-104°F (0 - 40°C). 90% non-condensing relative humidity.

## Mounting

Do not touch the lens.

1. Choose a location.
  - Ensure a clear line-of-sight to the Ceiling Receiver.
  - Keep away from ventilation ducts, lighting fixtures, and direct sunlight.
2. Install the collar.
  - Cut a 2 3/16" (55mm) square opening in the ceiling.
  - Insert the collar and hold it tightly against the ceiling.
  - Bend down the collar's four fingers.
3. Set DIP switches 1-4.
  - Set DIP switches to give the Ceiling Receiver the system address from 1 to 16 shown on the One-Line Diagram.
4. Wire.
  - Daisy-chain the Ceiling Receiver to Control Unit with low-voltage Class 2 (PELV) wiring for system communications.
5. Install the Ceiling Receiver.
  - Slide the Receiver through ceiling-mounted collar until flange butts against ceiling.

## Low-Voltage Class 2 (PELV) Wiring

- Use low-voltage Class 2 (PELV) wiring to daisy-chain Wallstations to Control Units and other components.
- Make connections inside the wallbox or in a switch/junction box with a maximum wire length of 8 feet (2.5m) from the link to the Wallstation.

### When used with GRAFIK Eye 3000 Control Units:

- Two #18 AWG (1.0mm<sup>2</sup>) conductors for common (terminal 1) and 12 V Direct Current (terminal 2). Ensure that the terminal 2 connection is wired correctly. Refer to GRX-3000 Specification Submittal for more details.
- One shielded, twisted pair #18 AWG (1.0mm<sup>2</sup>) for data link (terminals 3 and 4).

### When used with GRAFIK Eye 4000 Control Units:

- Two #12 AWG (2.5mm<sup>2</sup>) conductors for common (terminal 1) and 24 V Direct Current (terminal 2).
- One shielded, twisted pair #18 AWG (1.0mm<sup>2</sup>) for data link (terminals 3 and 4).
- Do not connect Drain/Shield to Ground (Earth) or Wallstation. Connect the bare drain wires and cut off the outside shield.
