

Quick Reference Guide

Lutron® proudly introduces a NEW line of designer roller shade fabrics. The Gallery Collection by Lutron offers a variety of color, texture, and pattern to accent any décor.

The entire Gallery Collection is lead-free and mercury-free. Refer to the following table to learn more about each family and their additional green properties.

The collection has two style categories — sheer and dim-out. Within the sheer category, there are burnout and texture fabric options. Within the dim-out category, translucent and privacy fabrics are available.

Enjoy the convenience and precision of Lutron roller shades with the beauty of The Gallery Collection. Reflect your style and control daylight.

Fabric Name	Usable Roll Width	Openness Factor (%)	Railroading	Seaming	PVC-free	GREENGUARD® Certified (US)	Oeko-Tex® Standard 100 Certified (Europe)	NFPA 701 Fire Rated (US)	M1 Fire Rated (Europe)	Stocked (Category 1 - see below)	Premium (Category 2 - see below)	Custom (Category 3 - see below)

Stocking Categories

All Lutron roller shade fabrics have been divided into three stocking categories. This stocking program allows us to offer a wider variety of fabrics for your use. **Gallery Collection fabrics currently fall into Category 2 - Premium.** Please review the categories below for fabric availability information and product support.

Category 1 – Stocked

- Completed shades are available for shipping within **15 business days** from receipt of order, and within **10 business days** if a speed-e order is placed for Sivoia QED® shades.

Category 2 – Premium

- Completed shades are available for shipping within **20 business days** from receipt of order.

Please note that the following sampling information applies to both Category 1 and Category 2 fabrics only

- Memo Samples will be processed within 48 to 72 hours from Lutron. Refer to the SCT under **Marketing Materials** for model numbers or call your Lutron Customer Service Representative for assistance.
- Fabric Binders are available for these fabrics. Refer to the SCT under **Marketing Materials** (GALLERY-BNDR-SET) or call your Lutron Customer Service Representative for assistance. Please visit www.lutron.com/binders to register your binder in order to receive free binder update kits in the future.

Category 3 – Custom

- Completed shades are available for shipping in a minimum of **30 business days** from receipt of order - **subject to availability**
- Memo Samples are to be provided by the fabric supplier. Contact your Lutron Customer Service Representative to process these samples. Once an order has been placed, fabric samples will be shipped directly to you from the fabric supplier.
- **Fabric Binder Cards are not available for Custom fabrics.**

Railroading/Seaming

Railroading rotates a fabric 90 degrees. Please note that railroading any fabric with a distinctive pattern will cause the pattern to also rotate 90 degrees, thereby altering the final appearance. The maximum height for railroaded shades is 15 inches less than the usable roll width. This rule does not apply to Montana, which is the only fabric that can be seamed to exceed these limits.
