

## HomeWorks QS Design and Programming 101

### *Who should attend?*

New programmers and system designers from HomeWorks QS Qualified Accounts or programmers and system designers from existing accounts looking for a refresher training

This 2-day course provides an overview of the HomeWorks QS system architecture, along with an in-depth look at its products and features. It will cover core programming concepts and common applications through instructor-led discussions and hands-on labs. Programming topics covered include:

- Keypad button programming including button types/LED logic
- Timeclock programming
- Occupancy/Vacancy sensor programming
- Single-variable programming
- Basic conditional programming
- Security Mode and Device Locking
