

Control + Driver + Fixture

Good – Start with Lutron controls to reduce energy use, increase lighting flexibility and performance, and enhance space aesthetics; scalable from a single space to an entire building, controls are an ideal entry point

Better – Add high-performance Lutron LED drivers to achieve flicker-free dimming control down to .1%, take advantage of advanced system diagnostics, and appreciate the peace of mind that comes with simple system design

Best – Compatible Lutron controls, Lutron drivers and Lutron fixtures can deliver the gold standard in LED lighting – guaranteed dimming performance, superior CRI and color consistency, and beautiful fixture aesthetics backed by a worry-free, 10-year warranty

Leadership in LED Control and Performance

Let us help you specify the LED control solution that best meets your project goals. From simple, energy-saving control to a high-performance, fully integrated LED solution, Lutron offers scalable options for your budget and performance needs.
