

Homeowners can bring energy savings – and a little bit of movie magic – to their family room with Maestro Wireless. With a Pico™ wireless control, lights can easily be adjusted at the touch of a button. A favorite light level can even be saved so the one used most can be returned to again and again. Setup is simple, taking less than a minute.

The Pico wireless control allows you to control the lights you need – when you need them.

Place it on a bedside table, mount it on a wall, attach it to a car visor, or use it as a portable hand-held device. Controllers can be purchased separately, so you can operate up to ten dimmers remotely.

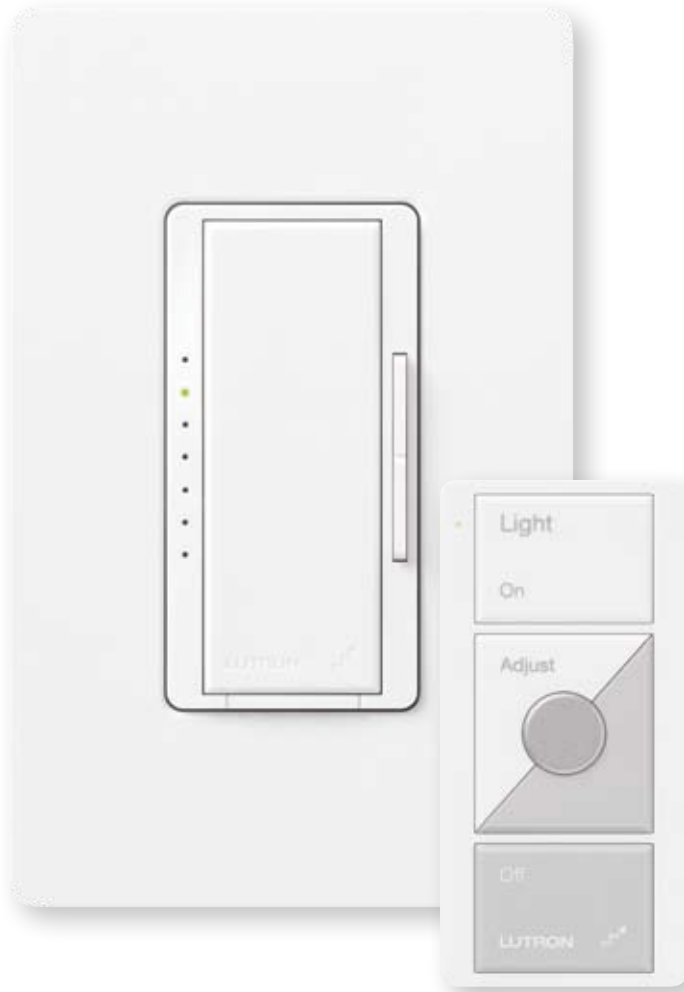

Maestro Wireless uses Lutron's Clear Connect RF Technology™. RF signals travel through walls and floors, so you don't have to be in the same room to control your lights. Each Pico wireless control uses one of over a half-million unique addresses... so your neighbor's signal will not interfere with yours.

No rewiring – Mount a Pico wireless control where there was never a switch before for a quick, easy-to-install solution to a 3-way application.

Take advantage of Maestro Wireless® flexibility – install it wherever you want wireless control of your lights:

- porch
- foyer
- mudroom
- kitchen
- hallway
- outbuilding
- garage
- boat dock
- stairwell
- nursery
- bathroom
- home theater
- second control location in the same room

Shown actual size: Maestro Wireless® preset dimmer, 1-gang Claro® wallplate, and Pico™ wireless control
