

Client PC Laptop

The Q-Admin™ client PC is a laptop PC used to run the *Quantum* light management software application *Q-Admin* or the *Green Glance*™ energy savings display software (one PC needed per *Green Glance* terminal).

Q-Admin allows the operator to control the *Quantum* system, monitor system status, perform diagnostics, and run system reports.

Green Glance allows real-time and historical Lutron lighting energy data to be displayed on an LCD display or the computer monitor.

Minimum Hardware Configuration Provided

- Single Intel CPU with minimum speed of 2.0 GHz
- 512 MB RAM
- 36 GB hard drive
- One (1) 10/100/1000 Ethernet network interface for communication to *Quantum* server
- LCD screen with 1024 x 768 resolution
- 48X CD/DVD-ROM drive
- 1 USB 2.0 port
- Standard laptop keyboard and mouse

Minimum Software Provided

- Licensed installation of Microsoft® Windows® XP Professional in local languages
- Contact Lutron for local languages supported
