

Locked Presets (LP)

Turns dimmer locked presets on or off.

Syntax:

Command, Parameters

LP,<Enable/Disable>(<Local Changes>,<Preset Level>)

Parameter	Description	Format
Enable / Disable	Turns Locked Presets on or off	ON / OFF
Local Changes	Allows local preset changes to be made to each individual dimmer	ON / OFF
Preset Level	Set a preset level (system wide) or capture the current local preset levels	1 – 100, LOCAL

Examples:

Enable locked presets, disallowing local changes and initializing the presets to 90%.

LP,ON,OFF,90

Enable locked presets allowing local changes and initializing the presets to the current local preset level.

LP,ON,ON,LOCAL

Disable locked presets

LP,OFF

Notes:

- Enabling or disabling Locked Presets will affect all dimmers, in all systems controlled by the Chronos™ System Bridge and Timeclock.
- When enabling locked presets the Local Changes and Preset Level parameters must be specified.
- This command only applies to the *Chronos*.

To Adjust Locked Preset Levels of Individual Dimmers:

Note: Local Changes parameter must be ON for individual dimmer Locked Preset adjustments.

- 1.) Quickly tap the tapswitch 4 times. The dimmers LED will begin flashing quickly at the current Locked Preset Level.
- 2.) Use the Raise / Lower rocker to adjust the Locked Preset. **NOTE:** If the dimmer is inactive for 6 seconds any changes will be discarded and the dimmer will return to normal operation.
- 3.) Quickly tap the tapswitch 4 times to save the new Locked Preset Level.
