

Residential LED Lighting and Fixtures Overview

Who should attend?

Principals, project managers, and system designers from qualified accounts

What will be covered?

This full-day training will offer a review of LED lighting technology and Lutron's Residential Fixture offering, including new additions and updates. The course will discuss how Lutron provides high-performance products and solutions for a wide variety of LED dimming applications and capabilities including 0.1% dimming, warm dimming, white tuning, and full color control. Covered in this course will be the various methods for controlling an LED light source including a discussion on digitally addressable lamps and fixtures to provide superior performance and flexibility.
