

Lutron | Wood Blind Selection Guide

Residence: _____ Area: _____ Window(s): _____

Step 1 Select Mounting Option

Inside mount

Outside mount on trim

Outside mount above trim

Step 2 Measure Height and Width

Inside mount:

Measure the window to the nearest 1/8 inch at points A through F to determine the width of the headrail (A, B, C), and the height of the lowered blind (D, E, F). When ordering, specify the smallest height and width measured.

A _____ inches

B _____ inches

C _____ inches

D _____ inches

E _____ inches

F _____ inches

Outside mount:

Set any width based on the desired coverage: _____ inches

Measure from the top edge of the trim to the window sill at points G through J to determine the height of the lowered blind.

For mounting **on trim**, enter G, H, and J as measured.

For mounting **above trim**, add 4 inches or more to each measurement for proper headrail clearance.

G _____ inches

H _____ inches

J _____ inches
