## OMX-4600 Control Unit

## Description

- Used with GRAFIK 5000/6000/7000 Centralized Lighting Control Systems.
- Supplies dimming for up to 24 zones of lighting ${ }^{1}$.
- Provides pushbutton recall of four preset lighting scenes, plus Off.
- Controls virtually any light source via dimming and switching panels.
- Provides lockout options to prevent accidental changes.
- Includes built-in infrared receiver for operation with an optional remote control.

## Models available to:

- Control two to 24 zones of lighting ${ }^{1}$.

1 OMX-4600 Control Unit zones count towards the maximum number of zones allowed in GRAFIK 5000/6000/7000 Systems.

## Specifications

## Power

- Low-voltage type Class 2 (PELV) Operating voltage: $32 \mathrm{~V}=-$ Direct Current.

## Lighting Sources/Load Types

Controls lighting sources with a smooth, continuous Square Law dimming curve or on a full conduction non-dim basis via GP and LP Dimming Panels and XP Softswitchtм Panels.

## Preset Control

- 4 preset lighting scenes and off are accessible from the Control Unit front panel.
- Additional scenes are stored in Processor Panel. These scenes are accessible via Wallstations, Control Interfaces, and/or PC.
- Light levels fade smoothly between scenes. Fade time can be set differently for each scene, between $0-59 \mathrm{sec}$. or $1-60 \mathrm{~min}$. Fade time from Off is capped at 5 sec . Fade time can be set differently for each zone through the Processor.

## Key Design Features

- Meets IEC 801-2. Tested to withstand 15kV electrostatic discharge without damage or memory loss.
- Power failure memory automatically restores lighting to the scene selected prior to power interruption.
- Faceplate snaps on with no visible means of attachment.

## System Communications and Capacities

- Low-voltage type Class 2 (PELV) wiring connects Control Units to other system components.
- The OMX-4600 Control Unit counts as one of 32 maximum Wallstations and/or Control Interfaces allowed on a Class 2 (PELV) Control Station Device Link.

## Environment

- $32-104^{\circ} \mathrm{F}\left(0-40^{\circ} \mathrm{C}\right)$. Relative humidity less than 90\% non-condensing.

## How to Build a Model Number

## Prefix:

OMX for Control Units used with
GRAFIK 5000/6000/7000 systems.

## Number of Zones:

$2,3,4,6,8,16$, or 24
Cover Option:
A for Opaque
T for Translucent Black

## Color Option:

See Color Options list

## Model Numbers

| Number <br> of Zones | Standard Setup |
| :--- | :--- |
| 2 | OMX-4602--_-- |
| 3 | OMX-4603-_-- |
| 4 | OMX-4604---- |
| 6 | OMX-4606---- |
| 8 | OMX-4608---- |
| 16 | OMX-4616---- |
| 24 | OMX-4624---- |

## Cover Options

Opaque A
Cover and Base will match.
Translucent Black T
Black Cover and choice of Base color.

Also available:

- Custom controls
- Color matching
- Engraving

These options ship in 4 to 6 weeks.

## Low-Voltage Class 2 (PELV) Wiring

- All wiring must be daisy-chained.
- Make connections in the Control Unit's wallbox or in a switch/junction box with a maximum wire length of 8 feet (2.5m) from the link to the Control Unit.
- Keep Shield/Drain continuous but do not ground. Connect the bare drain wires and cut off the outside shield. Do not connect to Ground (Earth) or Wallstations/Control Interfaces.
- Begin and end the wiring link with Link Terminators.
