

Temperature Control from Lutron

Lutron, Temperature Control

Why temperature control?

Lutron light and shade controls have always saved energy. So, expanding our energy-saving solutions beyond light control was only natural.

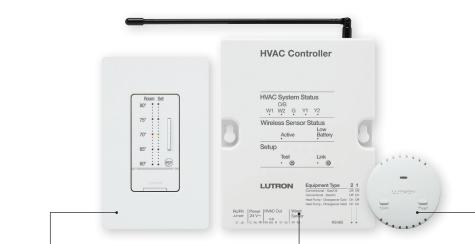

Lutron temperature controls were designed to work in conjunction with our total home control systems and provide convenience, flexibility and energy savings in an aesthetically pleasing design.

Temperature control solutions for any application

A three-part thermostat

You can install each component of the thermostat where it makes the most sense.

- Place the seeTemp™ wall control wherever you desire control, without regard for the local temperature.
- Place the wireless temperature sensor where readings will be most accurate—no need to run wires to that location.
- Install the HVAC controller out of sight near the equipment it is controlling.

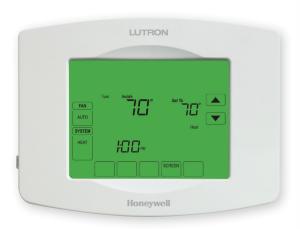

The **seeTemp wall control** shows current room temperature and set point, and allows you to adjust the set point and system mode (heating, cooling, auto, fan on/off).

The **HVAC controller** receives wireless commands from the seeTemp wall control and wireless temperature sensor, then controls HVAC equipment using 24V relays. The HVAC controller also communicates with the main repeater to integrate temperature control into your RadioRA® 2 system.

The wireless temperature sensor (battery-powered) is surface-mounted to the wall in the living space. It detects temperature and transmits that information to the HVAC controller.

An all-in-one design—TouchPRO Wireless_™

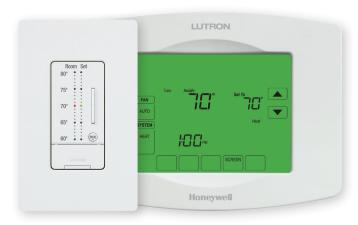

This solution combines a touchscreen interface, temperature sensor, HVAC control relays, and communication with your Lutron system in one device.

The **TouchPRO Wireless** with Clear Connect_™ Technology combines the trusted Honeywell brand with Lutron innovation. It looks like a conventional thermostat, is easy to install and program, and is a simple way to add temperature control to the RadioRA_® 2 system. You can also control the thermostat from mobile devices and keypads.

Compatible with seeTemp_™ wall controls

With seeTemp and TouchPRO Wireless you get the benefits of the all-in-one design, as well as multiple control locations with the seeTemp wall control. The designer style of seeTemp enhances décor.

seeTemp wall control and TouchPRO Wireless

Temperature control from Lutron® is available for RadioRA® 2 and HomeWorks® QS (coming soon) total home control systems.

Benefits

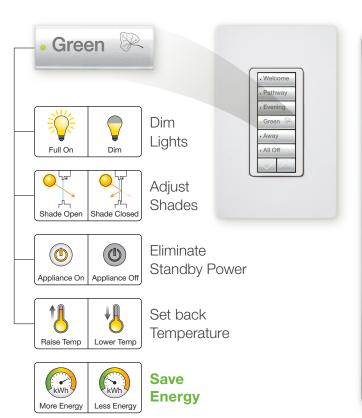

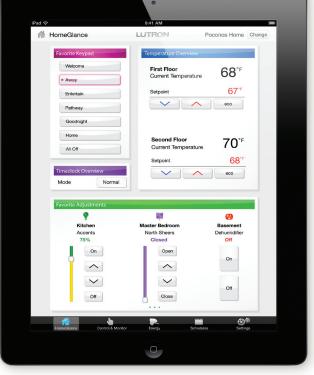

White Ivory Almond Light Brown Almond Black Hot Merlot Plum Turquoise Taupe Eggshell Biscuit Snow Midnight Sienna Palladium Greenbriar Bluestone Goldstone Desert Mocha Stone Stone Stone Limestone

RadioRA® 2 dimmer ganged with seeTemp™ Wall Control

Aesthetics

- The seeTemp wall control's elegant, slim design allows it to blend in with a room's décor.
- Reduce wall clutter by installing the seeTemp wall control in any wallbox, either ganged with dimmers and keypads or on its own.
- The seeTemp wall control is available in gloss and Satin Colors_® (shown above, right) to match any décor.

Energy Savings

- Save up to 16% of the energy used on HVAC* with Lutron temperature control.
- Use temperature scheduling to automatically reduce HVAC use at night, while away, or during other times it isn't needed.
- Use the "Green" button (shown above)
 to control lights, shades, appliances and
 temperature as part of a whole home system.
 The "Green" button dims lights 5%, lowers
 shades to block heat gain and sets back
 the temperature 2° F. You can save more by
 personalizing these settings.

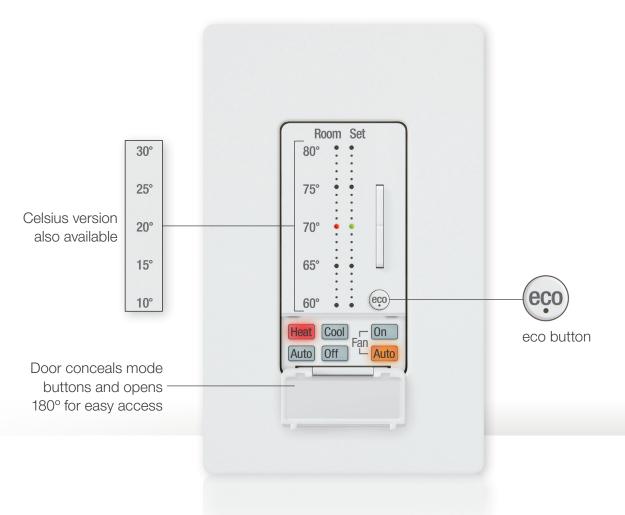

Convenience

- Control the temperature from anywhere via seeTemp[™] wall controls, system keypads, your iPad[®], iPhone[®], iPod touch[®]¹, Android[™]², or 3rd-party remote controls and touchscreens.
- Automatically schedule your thermostat to turn off after you leave for work and turn on before you return.

Product Features

seeTemp_™ Wall Control

- eco button adjusts temperature 2° F to save energy without sacrificing comfort
- · Celsius and Fahrenheit versions available
- Multiple seeTemp wall controls may be used—providing multi-location control
- Communicates via Lutron_® Clear Connect_™ RF Technology to ensure reliable communication and consistent performance

TouchPRO Wireless_™ with Clear Connect_™ technology

- Designed by Honeywell and communicates via Lutron Clear Connect RF Technology
- Features an intuitive touchscreen interface
- Easy installation—replaces existing thermostat
- Compatible with designer seeTemp™ wall controls
- Create energy-saving schedules using HomeControl+ app
- Control temperature from keypads, sensors, mobile devices and third-party control systems

Product Features

System Control Options

- Connects to and controls HVAC equipment using standard low-voltage thermostat wiring
- Integrates temperature control with a Lutron whole-home control system
- Communicates via Lutron Clear Connect RF Technology
- Includes wired return air duct sensor (required)

Note: HVAC controller should be installed by a professional HVAC contractor

Wireless Temperature Sensor

- No wires—5 year battery life
- If more than one sensor is associated with an HVAC controller, temperatures are averaged
- Communicates via Lutron_® Clear Connect_™ RF Technology
- Compatible only with the HVAC controller

iPad_®, iPhone_®, iPod touch_®¹, Android²,

View the current temperature, adjust the set point and system mode, and manage your thermostat schedule using Lutron's Home Control+ app. Use it for convenience while at home or while you're away.

seeTouch_® Keypads

Include temperature control in whole-home scenes like a "Goodnight" scene. When you press the "Goodnight" button the lights turn off and temperature sets back a few degrees to save energy overnight.

"Away" Mode

If you're going on vacation, select "Away" mode to run a series of lighting events that make your home look occupied. "Away" mode can also maintain an energy-saving set point. If someone stops by and adjusts the temperature, the system will reinstate the "Away" set point—every 6 hours.

System Control Options

System Diagram

3rd-party Integration

View the current temperature and adjust the set point and system mode from your favorite home automation system or programmable remote control. Temperature control commands are available using Lutron's integration protocol via RS-232 or IP.

Occupancy/Vacancy Sensors

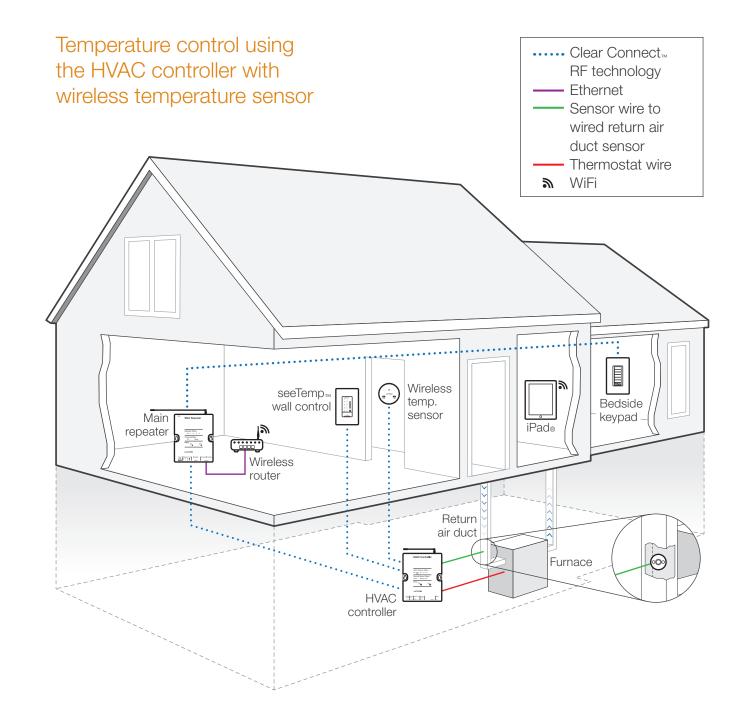

Lutron's Radio Powr Savr™ occupancy sensors can select a set point when a space is occupied, and another when the space is vacant, automatically saving energy when no one is around.

HVAC Schedule

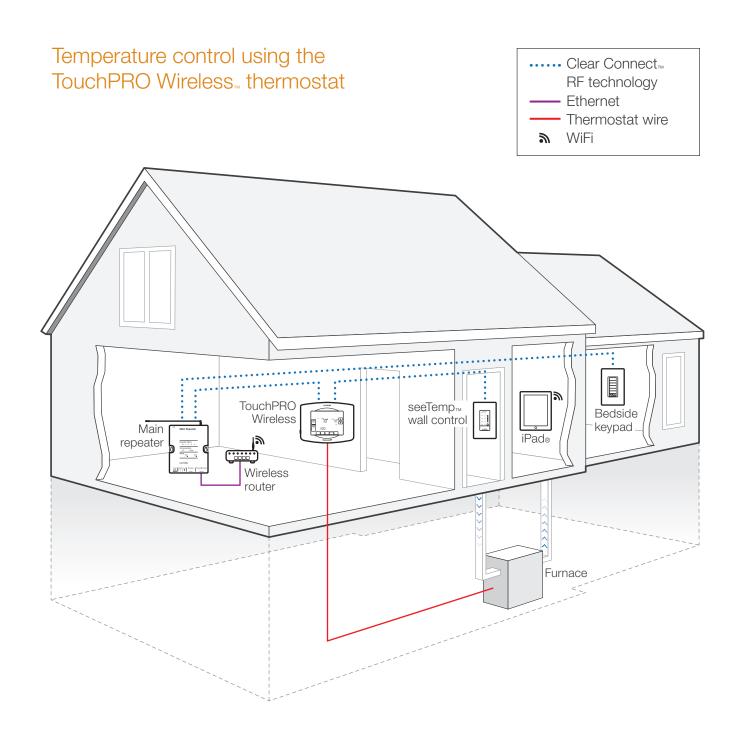

Automatically control your temperature to save energy using the 7-day, 4-event HVAC schedule. The schedule includes recommended settings to save energy and maintain comfort.

HVAC System Compatibility

HVAC Type	Compatible?
Single Stage Cool	Yes
Two Stage Cool	Yes
Single Stage Heat	Yes
Two Stage Heat	Yes
Packaged Roof Top Units	Yes
Heat Pump	Yes
Dual Fuel Systems	Yes-Requires a separate Fossil Fuel Kit*
Geothermal Heat Pump	Yes
Heat Pump with Auxiliary Electric (Emergency) Heat	Yes
Typical Variable Speed Fan (Equipment Controlled)	Yes
Multi-Zone Systems (Controllable Dampers)	Yes - Requires a separate Zone Controller*
In-Floor Radiant Heat	Yes
Line Voltage Electric Baseboard	No
Mili-Volt System	No
Proprietary/Digital Control System	No
Variable Speed Fan (Independent Relays)	No
Humidity Control	No
Humidity Sensing	No
Outdoor Temperature Sensing	No
