The designer dimmer that matches your paddle switches.

**PRODUCT FAMILY FEATURES**
- Large paddle switch with a captive linear-slide dimmer for a standard designer wallplate opening
- Full family of products for most lighting sources
- Dimmers feature built-in soft-glow nightlight
- Uses standard single-pole and 3-way wiring for easy installation in any home
- For more Diva choices, see the new Diva Satin Colors product line

**DIMENSIONS**

| *some models up to 1.44” (37mm) |

**SPECIFICATION SERIES STANDARD FEATURES**
- Square Law Dimming
- RFI suppression
- Power-failure memory
- Captive linear slider
- Electrostatic discharge tested
- Precise color matching
- Mechanical air-gap switch to disconnect load power

Lutron controls are rated at 120VAC, 60Hz unless otherwise noted.

**CONTROLS AND ACCESSORIES**

- **Preset Dimmers**
- **Fan-Speed Controls**
- **Switches**

**Receptacles**
- 15A Receptacle
- 15A GFCI Receptacle

**Telephone/Cable TV Jacks**
- Single Telephone Jack
- Cable TV Jack

**Ports**
- 6-Port Frame

**Standard Multigang Wallplates**
- 2-gang to 6-gang wallplates
### HI-POWER 2×4×6™ DIMMING MODULES

To increase load capacity up to 30,000W/VA in most popular sources, use one DV-600P- or DV-603P- and add up to five dimming modules. Cannot be used with 0-10VDC ballast.

### FAN-SPEED CONTROLS

#### Quiet Controls

For use with one ceiling paddle fan.

- Single pole/3-way, 1.5A: DVFSQ-F-3-speed

Note: Does not have soft-glow nightlight. For 3-way and 4-way switching, use with Claro switches or other mechanical switches.

### SWITCHES

#### General Purpose Switching of all Sources and Motor Loads

- Single pole, 120/277V: 15A
- 3-way, 120/277V: 15A
- 4-way, 120/277V: 15A

### ACCESSORIES

#### Receptacles

- Receptacle: 15A, 125V

#### GFCI Receptacle

- 15A, 125V

#### Telephone and Cable Television Jacks

A physical barrier (partition) must exist when ganging with line-voltage products.

- Single Telephone Jack: 6-conductor, RJ11
- Cable TV Jack: 75-Ohm, coaxial cable jack

---

1. For capacities in multigang installations see derating pg. 3.
2. Actual lamp wattages.
3. No derating required if ganged.
4. A physical barrier (partition) must exist when ganging with line-voltage products.

DIVA® Controls

DIVA CONTROLS AND ACCESSORIES

PART 1 – GENERAL

1.01 Summary
A. Scope: Provide, install and test all switches, dimmers and related devices as specified herein for the areas indicated on the drawings, specifications, and load schedules.
B. Related Sections: Section 16580 (Ballasts), Section 16570 (Dimming Systems).

1.02 References
A. UL 20, UL 1472, CSA, NOM, ISO 9001

1.03 System Description and Operation
A. Permanently installed, wallbox mounted switches and dimmers
B. Permanently installed, wallbox mounted fan-speed controls
C. Permanently installed, wallbox mounted receptacles
D. Permanently installed, wallbox mounted data, voice and cable jacks
E. Screwless, seamless wallplates

1.04 Submittals
A. Submit manufacturer’s standard catalog data giving all application, wiring, and installation information on basic components and wallplate kits. Provide test data and/or samples as required to demonstrate conformance with PART 2 of this specification.

1.05 Quality Assurance
A. Manufacturer shall have a minimum of 10 years continuous experience in manufacturing wallbox dimming products
B. Dimmers, switches and Fan-speed controls shall be UL listed, CSA and NOM approved specifically for each required load (i.e., tungsten, electronic low voltage transformer, magnetic low voltage transformer, and fluorescent). Manufacturer shall provide file card or certificate upon request. Universal load-type dimmers shall not be acceptable.
C. Manufacturer shall maintain ISO 9001 certification and provide a copy of the certificate upon request.

1.06 Warranty
A. All devices shall be covered by a minimum one-year warranty.

PART 2 – EQUIPMENT

2.01 Acceptable Manufacturers
A. Lutron Electronics Co., Inc.
B. Unless otherwise noted, all basic components (dimmer, fan-speed control, switch, receptacle, telephone jack and cable TV jack) and wallplate kits shall be provided by one manufacturer.

2.02 Equipment
A. Controls Lutron Diva Style
1. Performance
   a. Dimmers shall provide full-range, continuously variable control of light intensity.
   b. Wall controls shall fit a decorator wallplate opening with a paddle switch. Dimmers shall have a small, raised slider to the right of the paddle switch. Controls shall have a gloss finish.

   c. When on, the slider shall change the light level/fan speed. When off, the slider shall preselect the light level/fan speed that the control will turn on to. Paddle switch shall turn lights/fan on to the preselected level, or off.
   d. Paddle switch and slider shall be captured internal to the control.
   e. 3-Way controls shall be capable of multi-location on and mechanical air-gap off using standard 3-way and 4-way switches. Multi-location switches shall be Claro decorator style with a gloss finish.
   f. Dimmer shall be backlit with soft glow locator light.
   g. Within rated capacity, dimmers shall be available for direct control of incandescent, magnetic low voltage, electronic low voltage, and fluorescent. Matching fan-speed controls shall also be available.
   h. Controls shall be capable of operating at the rated capacity; this includes modified capacities for ganging configurations which require the removal of fins. Operation at rated capacity shall be possible across the full ambient temperature range, without shortening design lifetime.
   i. To ensure a precise color match between all plastic parts, color variation of any gloss finish control shall not exceed a delta E of 1, CIE L*a*b* color units, as defined in ASTM E 308-99.
   j. Dimmer shall provide smooth and continuous Square Law dimming curve, for the full slider travel, on their rated load per The IESNA Lighting Handbook, 9th edition, p. 27-4.
   k. Controls shall meet the applicable requirements of UL 20 and UL 1472 referring to the inclusion of a visible, accessible air-gap off switch and the limited short circuit test.
   l. Controls shall meet ANSI/IEEE Std. C62.41-1980, tested to withstand voltage surges of up to 6000V and current surges of up to 200A without damage.
   m. Dimmers shall be designed to reduce interference with radio, audio, and video equipment.
   n. Controls shall incorporate power-failure memory. Should power be interrupted and subsequently returned, the lights or fans will come back on to the same levels set prior to the power interruption. Restoration to some other default level is not acceptable.
   o. Controls shall not be susceptible to damage or loss of memory due to static discharge.
   p. Controls shall operate in an ambient temperature range of 0°C (32°F) to 40°C (104°F).
   q. 3-Way controls shall wire using conventional 3-way and 4-way wire runs.
   r. Contractors shall install all backboxes with a minimum wallbox depth of 2.5 inches.

2. Incandescent Dimmers
a. Provide single-pole and 3-way incandescent dimmers in 600 Watts and 1000 Watts capacities.
b. Dimmer shall be capable of operating in either 3-way switch location.
c. Dimmer shall be capable of operating in either 3-way switch location.

3. Electronic (Solid State) Low Voltage (ELV) Transformer Dimmers
a. Provide ELV dimmers for direct control of up to 300 watts of electronic low voltage load.
   b. Dimmers shall contain circuitry specifically designed to control the input of electronic (solid state) low voltage transformers. Dimmers using standard phase control shall not be acceptable.
c. Dimmers shall have a resettable overload protection that automatically shuts off when dimmer capacity is exceeded. Protection methods that are non-resettable or require the device to be removed from the wall to reset shall not be acceptable.

d. Dimmers shall be designed to withstand a short, per UL 1472 section 5.10, between load hot and either neutral or ground without damage to the dimmer.

4. Magnetic Low Voltage (MLV) Transformer Dimmers
a. Provide MLV dimmers for direct control of up to 1000 volt amps of electronic low voltage load.

b. Dimmers shall contain circuitry specifically designed to control and provide a symmetrical AC waveform to the input of magnetic low voltage transformers per UL 1472 section 5.11.

c. Dimmers shall not cause a magnetic low voltage transformer to operate above the transformers rated operating current or temperature.

d. Dimmer shall be capable of operating in either 3-way switch location.

5. Fluorescent Dimming Ballast Dimmers
a. Provide Fluorescent dimmers for direct control of fluorescent dimming ballasts up to the manufacturers specified rating.

b. Dimmers shall be designed to operate the following ballasts. Dimmers and ballasts shall be produced by the same manufacturer to ensure proper ballast/control compatibility:
   1) Hi-lume® Architectural Dimming Ballasts (1% 3-wire)
   2) Hi-lume® Compact™ Lamp Dimming Ballasts (5% 3-wire)
   3) Eco-10™ Lighting Management Dimming Ballasts (10% 3-wire)
   4) Tu-Wire™ High Performance Dimming Ballasts (5% 2-wire)

6. Remote dimming modules for high power loads
a. Where lighting loads exceed the full rated capacity of single dimmers, provide a Diva incandescent dimmer driving high power modules. High power module and dimmer shall be from the same manufacturer to ensure compatibility.

b. High power modules shall be remotely mounted.

c. High power module shall be rated and UL listed for control of incandescent, magnetic low voltage, electronic low voltage, fluorescent, and neon/cold cathode loads in increments of 2,000 Watts up to 30,000 Watts.

7. Fan-Speed Controls:
   a. Fan-speed controls shall be UL Listed, CSA and NOM approved, Lutron Diva style.
   
   b. Quiet fan-speed model shall provide three speed settings with paddle providing preset on and off.
   
   c. Quiet fan-speed control shall provide single-pole/3-way control of one paddle fan (1.5A max.).

B. Accessories Lutron Claro Style

1. Switch Components Lutron Claro Style
   a. Switches shall provide on/off control of any 120/277 VAC load up to 15A. Switches shall be UL Listed as general-use AC switches, Lutron Claro style.
   
   b. Switches shall be available in single-pole, 3-way and 4-way configurations.

2. Receptacle Components Lutron Claro Style
   a. All receptacles shall be UL Listed, CSA and NOM approved.

b. Receptacles shall be two pole, three wire ground and rated for 15A at 125VAC. All receptacles shall be NEMA configuration type 5-15R.

c. Ground-fault interrupter receptacles shall be Lutron Claro style with two-pole, three-wire ground and rated 15A at 125VAC. Configuration shall be of the duplex type with rectangular NEMA WD-6 design. Receptacles shall have a 5 milliampere ground-fault trip level with “test” and “reset” buttons.

3. Telephone Jack and Cable TV Jack Components Lutron Claro Style
   a. Contractor shall provide an appropriate barrier (partition) to isolate jack from high-voltage wiring when ganged with a dimmer, fan-speed control, switch, or receptacle. This complies with NEC Articles 800-3 and 820-13.
   
   b. Telephone jack shall be designed to mate with standard 4- or 6-conductor modular jacks, and be compatible with 2, 4, or 6 conductor lines. Telephone jacks shall meet FCC Part 68, paragraph F standards to ensure compatibility with U.S. telephone systems.
   
   c. Cable TV jacks shall be the coaxial type, designed for use with standard 75-Ohm cables.
PART 3 – EXECUTION

3.01 INSTALLATION
A. Contractor shall furnish all devices (dimmers, accessories, & wallplate kits), labor and other services necessary for the proper installation of the devices as indicated on the drawings and specified herein.
B. Contractor shall be responsible for derating dimmer capacity if side sections are removed.
C. Contractor shall run separate neutral wires in 120/208 VAC installations.
D. Devices shall be installed utilizing manufacturer’s recommended application, wiring and installation instructions.
E. Contractor to provide seamless wallplate covers per specification 2.02 for all devices ganged in a common box. Contractor shall provide barriers within the box where required by code.

3.02 FIELD QUALITY CONTROL
A. Twenty-four hours a day, seven days a week, global customer service and technical hotline available.
B. Supplemental information shall be provided by manufacturer’s Internet site.
