SHEERWEAVE® CLEANING INSTRUCTIONS

These cleaning practices will not affect the products' ability to resist the growth of microorganisms.

For routine cleaning, use a soft brush with water and a few drops of mild detergent such as dishwashing liquid. Rinse well.

For stains and spills, commercial cleaners such as 409 or Tilex may be used as above followed by a water rinse. Rinse well. You may also use a mild bleach solution (1 part bleach, 3 part water), and a soft brush. Rinse well.

Paint solvents will damage the vinyl surface of the SheerWeave products and should not be used
