

# Lutron motion sensors

Entering a room

After leaving a room

Lutron sensors won't leave you in the dark. A motion sensor will get the lights for you. It turns lights on when you walk into a room and off when you leave.

Motion sensors are great for rooms you often enter with your hands full, such as a laundry room, or rooms where lights are accidentally left on, such as a garage or walk-in closet.

	Product Name	Quantity and Location	Installed Price
	<b>Motion Sensor Switch</b> Hands-free lighting and fan control MS-OPS5M-WH*		
	<b>Motion Sensor Dimmer</b> Lights come on to your favorite light level MSCL-OP153M-WH*		

\* Wallplate not included (in case devices are ganged).
