

Caséta® Wireless Fact Sheet (updated 1/1/16)

Creating a smarter and more connected home has never been easier. Lutron Caséta Wireless products and the Lutron Smart Bridge and app is a smart, connected home mobile solution. The wireless Smart Bridge and software application connects Lutron's Caséta Wireless dimmers, Pico® wireless remote controls, Serena™ remote-controlled shades, and other third-party devices, while providing convenient home control from any iOS or Android-based smart phone or tablet. The Caséta Wireless system gives consumers the ability to control lights and shades inside or outside the home — from the free iOS or Android-based Lutron App on a smart device, from a Lutron Pico remote control, or by using Siri on their iPhone® or iPad® with Apple HomeKit.

Caséta Wireless benefits

1. Flexibility – works with the newest energy-saving bulbs, including dimmable LEDs, dimmable CFLs, halogens, and incandescents.
2. Reliability – works with Lutron's patented radio frequency (RF) Clear Connect Wireless technology, so dimmers won't be affected by other wireless products, and making it easy to work around corners and through walls.
3. Convenience – provides ability to install the Pico remote controls anywhere and adjust to your perfect light level.

Caséta Wireless products

1. Caséta Wireless in-wall dimmers: control overhead lights and work with the newest energy-saving bulbs. They do not require a neutral wire, so they easily replace any existing light switch.
2. Caséta Wireless plug-in lamp dimmers: plug into a standard wall receptacle and provide control of table and floor lamps. They are designed to control two lamps simultaneously with dual plug-in receptacles.
3. The Pico Wireless remote control: features a 10-year battery life can be used as a hand-held remote to control dimmers, or it can be surface mounted to the wall, attached to a car visor, or placed on a tabletop pedestal.
4. The Lutron Smart Bridge, which uses Lutron's proprietary ClearConnect® Wireless technology, plugs easily and directly into a home's Wi-Fi router. Installed and set up in less than 30 minutes, the product sends wireless, radio frequency (RF) communication signals to compatible Lutron devices inside the home.

Third-Party integration

1. Lutron shades- Caséta Wireless is compatible with Lutron's motorized Serena™, Sivoia® QS and Triathlon® shades.
2. Apple® HomeKit- the Lutron Smart Bridge contains Apple HomeKit technology, so you can use Siri® to control your lights and shades.
3. The Smart Bridge PRO provides integration with select third-party A/V controls like Control4®, Remote Technologies Incorporated (RTI), Savant, and Universal Remote Control® (URC) and provides an integrated home control solution.
4. Comcast XFINITY Home- Control your lights from anywhere using the XFINITY Home app.
5. Connected home hubs- Wink and Staples Connect
6. Create If This Then That (IFTTT) recipes, such as lowering your shades if it's sunny, or turning off lights if the Nest thermostat is set to "Away" mode
7. Logitech Harmony Living remote controls- Dim lights, lower shades, and start a movie with one button press on Logitech Harmony hub-based remote controls or from the Harmony app.
8. Nest Protect- connect Caséta Wireless to Nest Protect to turn on the lights and open the shades in the event of a smoke or carbon monoxide alarm
9. Security systems- the Alarm.com app provides control of both Caséta Wireless dimmers and Serena shades from the Alarm.com app, and as part of a security event. The Smart Bridge Pro is also compatible with select security systems from ELK Products and others.
10. Smart watches- Apple Watch® and Android™ Wear- puts control of lights, shades and more right on your wrist.
11. Thermostats- select Wi-Fi models from Carrier, Ecobee, Honeywell, and Nest
