

## **Caséta® Wireless Family of Light, Shade and Temperature Control from Lutron – Now with More Features that Add Convenience and Simplicity to Everyday Life**

**Coopersburg, PA (embargoed until January 5, 2016)** – Creating a smarter and more connected home has never been easier. The affordably-priced Caséta Wireless smart home system from Lutron Electronics provides convenient control of lights, shades and temperature anytime, anywhere, from a remote control or the Lutron App. Today, the company announced several Caséta Wireless system enhancements: an expanded line of compatible thermostats, new controls for in-wall and in-ceiling lights, and new ways to integrate Caséta Wireless with other familiar, connected home products. These additions provide users with simple, convenient control of some of the most frequently-used products in their homes, making it simpler than ever to connect to your home from a mobile device.

With 20+ years of experience utilizing reliable wireless technology in connected home products, Lutron introduced the Caséta Wireless system in 2014 as an affordable connected home solution ideal for smaller areas.

### **New, Compatible Thermostats**

Lutron is giving Caséta Wireless users more options for controlling temperature. The new Lutron Wireless Thermostat powered by Honeywell® provides temperature control from anywhere using the Lutron App. This, in addition to the Nest thermostat, HomeKit compatible thermostats such as Honeywell Lyric™ and ecobee®3, and select Wi-Fi thermostats from Honeywell and Carrier®, offer homeowners a variety of familiar temperature controls at different price points.

### **New Controls for In-Wall and In-Ceiling Lights**

Other additions to the Caséta Wireless family include new controls for in-wall and in-ceiling lights. A new 1000 watt dimmer works with incandescent and halogen bulbs (up to 1000 watts) as well as dimmable LEDs and CFLs (up to 250 watts). Ideal for lights that don't need to be dimmed, a new neutral switch controls up to six amps of in-wall and in-ceiling lights or 3.6 amps of ceiling fan loads.

### **Caséta Wireless Works with Even More Connected Home Devices**

1. Control your lights from anywhere using the **Comcast XFINITY® Home** app.
2. In the event that your **Nest™ Protect Smoke + CO Alarm** detects smoke or carbon monoxide in your home, Caséta Wireless lights will turn on and your Lutron shades will open to help occupants find their way.
3. Get notifications on your **Android™ Wear** if lights haven't been turned off after you've left the house

– a great way to save energy when the home is vacant.

Caséta Wireless kits and Lutron shading solutions are available now with suggested list prices starting at \$80 and \$349, respectively. Visit [CasetaWireless.com](http://CasetaWireless.com) or [SerenaShades.com](http://SerenaShades.com) to find a local reseller. The free Lutron App is available on [iTunes®](https://itunes.apple.com) and [Google Play™](https://play.google.com).

## **About Lutron Electronics ([www.lutron.com](http://www.lutron.com))**

Founded in 1961, Lutron Electronics is headquartered in Coopersburg, Pennsylvania. From dimmers for the home, to lighting management systems for entire buildings, the company offers more than 15,000 energy-saving products, sold in more than 100 countries. In the US alone, Lutron products save an estimated 10 billion kWh of electricity, or approximately \$1 billion in utility costs per year. The company's early inventions— including the first solid-state electronic dimmer invented by Lutron's founder, Joel Spira—are now at the Smithsonian's National Museum of American History in Washington, DC.
