

Caséta® Wireless Fact Sheet (updated 12/28/16)

Creating a smarter and more connected home has never been easier. Lutron Caséta Wireless products and the Lutron Smart Bridge and app is a smart, connected home mobile solution. The wireless Smart Bridge and software application connects Lutron's Caséta Wireless dimmers, Pico® wireless remote controls, Serena™ remote-controlled shades, and other third-party devices, while providing convenient home control from any iOS or Android-based smart phone or tablet. The Caséta Wireless system gives consumers the ability to control lights and shades inside or outside the home — from the free iOS or Android-based Lutron App on a smart device, from a Lutron Pico remote control, or by using Siri on their iPhone® or iPad® with Apple HomeKit.

Caséta Wireless benefits

1. Flexibility – works with the newest energy-saving bulbs, including dimmable LEDs, dimmable CFLs, halogens, and incandescents.
2. Reliability – works with Lutron's patented radio frequency (RF) Clear Connect Wireless technology, so dimmers won't be affected by other wireless products, and making it easy to work around corners and through walls.
3. Convenience – provides ability to install the Pico remote controls anywhere and adjust to your perfect light level.

Caséta Wireless products

1. Caséta Wireless in-wall dimmers: control overhead lights and work with the newest energy-saving bulbs. They do not require a neutral wire, so they easily replace any existing light switch.
2. Caséta Wireless plug-in lamp dimmers: plug into a standard wall receptacle and provide control of table and floor lamps. They are designed to control two lamps simultaneously with dual plug-in receptacles.
3. The Pico Wireless remote control: features a 10-year battery life can be used as a hand-held remote to control dimmers, or it can be surface mounted to the wall, attached to a car visor, or placed on a tabletop pedestal.
4. The Lutron Smart Bridge, which uses Lutron's proprietary ClearConnect® Wireless technology, plugs easily and directly into a home's Wi-Fi router. Installed and set up in less than 30 minutes, the product sends wireless, radio frequency (RF) communication signals to compatible Lutron devices inside the home.

5. Caséta Wireless ELV+ dimmer: Phase selectable dimmer with the favorite button in the middle to recall a preset light level. Ideal for LED and ELV loads, but also works with MLV, halogen and incandescent. The dimmer does require a neutral wire, and because of that you can also use this dimmer with Lutron PHPM interfaces, GRX-TVI and our LTE LED drivers.

Lutron app for Caséta features

1. Manual scenes – create up to 50 manual scenes in the app to adjust lights and shades at the same time at the touch of a button (e.g. Welcome, Entertain, All Off).
2. Schedules scenes – create up to 50 scheduled scenes to automatically adjust lights and shades at either a fixed time or relative to sunrise/sunset.
3. Arriving/Leaving Home (geofencing) – automatically turn on lights when you arrive home at night, and turn them off when you leave based on the location of your smartphone
4. Widgets – quickly access your Lutron scenes right from the lock screen of your phone.
5. Smart Away – randomly turns lights on and off during the evening when you're away. Gives your home a lived-in look when you're not there.
6. Personalized home screen image – add your own custom image to the home screen of the app
7. Themes – choose from 4 different color themes for the app

Third-Party integration

8. Lutron shades- Caséta Wireless is compatible with Lutron's motorized Serena™, Sivoia® QS and Triathlon® shades.
9. Apple® HomeKit- the Lutron Smart Bridge contains Apple HomeKit technology, so you can use Siri® to control your lights and shades.
10. Works with Amazon Alexa-enabled products including Amazon Echo, Amazon Dot, Amazon Tap, or Amazon Fire TV with voice remote. Use your voice to control your lights.
11. Sonos-Enjoy one-touch control of your Sonos wireless speakers with the Pico remote control for audio. Play, pause, skip tracks, and adjust volume all from your fingertips. Also add music to manual or scheduled scenes, and add it into geofencing.
12. Samsung SmartThings™ –Caséta Wireless customers will connect its system dimmers and Lutron Serena shades to the Samsung SmartThings app, providing another option of control and convenience, for a more complete smart home.
13. The Smart Bridge PRO provides integration with select third-party A/V controls like Control4®, Remote Technologies Incorporated (RTI), Savant, and Universal Remote Control® (URC) and provides an integrated home control solution.

14. Comcast XFINITY Home- Control your lights from anywhere using the XFINITY Home app.
15. Connected home hubs- works with Wink hubs
16. Create If This Then That (IFTTT) recipes, such as lowering your shades if it's sunny, or turning off lights if the Nest thermostat is set to "Away" mode
17. Logitech Harmony hub-based remote controls- Dim lights, lower shades, and start a movie with one button press on Logitech Harmony hub-based remote controls or from the Harmony app.
18. AT&T Digital Life-Control your lights and shades from anywhere using the AT&T Digital Life app.
19. Nest Protect smoke+CO alarm - connect Caséta Wireless to Nest Protect to turn on the lights and open the shades in the event of an emergency
20. Nest Home/Away Assist-Senses when anyone is home or everyone's away and automatically adjusts the lights, shades, and temperature
21. Nest Cam – By leveraging the intelligence of Nest's person alerts, Caséta Wireless dimmers and switches can now turn on when a person is detected by Nest Cam Indoor or Outdoor, conveniently adding additional security and providing peace of mind.
22. Security systems- the Alarm.com app provides control of both Caséta Wireless dimmers and Serena shades from the Alarm.com app, and as part of a security event. The Smart Bridge Pro is also compatible with select security systems from ELK Products and others.
23. Smart watches- Apple Watch® and Android™ Wear- puts control of lights, shades and more right on your wrist.
24. Thermostats- Lutron Wireless Thermostat and select Wi-Fi models from Carrier, Ecobee, Honeywell, and Nest. Also compatible with any HomeKit-enabled thermostat
25. Hunter HomeKit-enabled fans – control the speed and dim the integrated light on Hunter HomeKit-enabled fans right from the Lutron app. Hunter Symphony and Signal fans are HomeKit-enabled.
26. Logitech® Pop Home Switch – Everyone in the family can trigger actions and adjust Caséta Wireless dimmers with the Logitech Pop Home Switch.
