Product Report Card

Manufacturer: **GE Lighting Solutions**

Model Number Tested: **93074767**

Other Model Numbers:

Manufacturer's Description

Type of Device: LED 6 W GU10

Operating Voltage: 240

Input Power: 6 W

Input Current: 0.025 A

Input Frequency: 50 Hz

Control Type: Forward and Reverse Phase Control

Dimming Range: Not Specified

Output Power: Not Specified

Lumen Output: 350 lm

Type/Shape: GU10

Base Type: GU10

Lutron Test Results

Date Tested 03/28/2018

Test Voltage 240 V

Test Notes Test results valid only at 240V and 50 Hz.

Lutron Recommended Products

Lutron products not in this list can be considered to be not recommended, based on our testing.

Notes:

- * Identical model numbers with different compatibility codes may have different performance; () means there is no compatibility code assigned; contact technical support for additional information.
- (1) Control types of FP and RP represent Forward Phase and Reverse Phase, respectively. See product literature for details.
- (2) Maximum Fixtures per Dimmer value represents the maximum safe loading of the control.
- (3) Values are based on light output using the specified dimming control, and may not be an indication of the fixture's full rated capability. Values are set to optimize performance, such as reducing dead travel, ensuring that fixtures turn on at low end, reducing turn-on time at low end, and trimming out instability. Software trim values are indicated in parentheses when applicable.
- (4) Perceived light level percentage is the square root of the measured light level percentage, per IESNA Lighting Handbook.
- (5) Interfaces have been tested with the listed control; any compatible dimmer may be used instead, but high end/low end light levels may vary slightly.
