**Featured Product:**

Cree Load Type for GRAFIK Eye QS

The GRAFIK Eye QS Wireless is now updated to provide easy configuration and optimized dimming for Cree LR4 and LR6 LED downlights. Simply selecting the Cree LR4/6 load type during initial programming adjusts the dimming algorithm for smooth, continuous dimming.

By combining energy-saving features of the GRAFIK Eye QS, such as wireless occupancy sensing and scheduling, with high-efficiency loads like the Cree LR4 and LR6, customers can attain energy savings of 60% or more.

**Did You Know?**

Department of Energy (DOE) CALiPER Testing

2006 marked the DOE’s launch of the Commercially Available LED Product Evaluation and Reporting (CALiPER) program. The initiative focuses on development, implementation, and testing standards for solid state lighting (SSL) general illumination products.

CALiPER recently posted results from its eleventh round of product testing, which focused on roadway arm-mount and post-top luminaires, linear replacement lamps, high-bay luminaires, and small replacement lamps. Summary and detailed reports for all CALiPER testing are available through the searchable online system at [www.ssl.energy.gov/search.html](http://www.ssl.energy.gov/search.html).
