

Lutron | company overview

Lutron Electronics designs and manufactures lighting controls and lighting control systems for both residential and commercial applications. The company offers a wide variety of light dimmers, whole-home and whole-building dimming systems, controllable window treatments and color-matched accessories, including wallplates, receptacles, fan controls, and more.

Lutron's complete line of lighting control solutions for residences, as well as for commercial projects located within North and South America, is supported by corporate headquarters in Coopersburg, Pennsylvania (northwest of Philadelphia).

A privately-held company, Lutron has numerous sales and service offices located throughout the US, Canada, and Mexico. Global sales and service efforts are supported by worldwide offices with European headquarters in London, Asian headquarters in Tokyo, and other sales and service offices located throughout Europe, the Middle East, and Asia.

Lutron is acknowledged throughout the lighting industry for its expansive product offerings, continued technological achievements, and stringent quality standards. Lutron has been recognized as the preferred brand by lighting designers and specifiers worldwide.

Lutron's founder, Joel Spira, invented the first solid-state electronic dimmer in 1961. Today, more than 45 years later, the company is still devoted to controlling lighting, offering more than 11,000 products around the globe, from simple-to-install single light dimmers to sophisticated dimming systems that orchestrate a home's, or building's total lighting environment, inside and out, to automated shade and drapery control systems.
