Mounting

Function

The HW-TEL9 provides access to up to nine different functions or events in a HomeWorks system from touch-tone telephones inside or outside the house. Each function can be programmed to control any devices connected to a HomeWorks system. A digital voice provides custom responses to verify each selected function.

Wiring Layout

Lutron Electronics Co., Inc.
7200 Suter Road
Coopersburg, PA 18036, USA
9/96 P/N 362-963

Overview of HomeWorks Integrated System

Telephone Line Connections
 Proper operation of the HW-TEL9 requires two telephone lines. One line services telephones inside the house and allows access to the HomeWorks system from these telephones. The second line is dedicated to the TEL9 only and provides system access from outside telephones.

Note: The inside house line must pass through the TEL9 first before connecting to any telephones. Answering machines can be used on this inside line without adversely affecting their operation.

Programming

The HW-TEL9 can be programmed with Lutron's Windows-based programming utility. Simple programming can also be done manually from inside telephones.

NOTE: Remote power modules can only be assigned to the HW-TEL9 using the Windows programming utility.

Warranty

Lutron will, at its option, repair or replace any control that is defective in materials or manufacture within two years after the purchase.

This warranty is in lieu of any other warranties, express or implied, and the implied warranty of merchantability is limited to two years from purchase.

This warranty does not cover the cost of installation, removal or reinstallation, or damage resulting from misuse, abuse, or improper wiring or insulation.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty may last, so the above limitations and exclusions may not apply to you.
