Maestro Wireless Dimmers and Switches

The Maestro Wireless solution incorporates Maestro Wireless load controls, wireless sensors, and wireless remote controls, which provide a system that delivers energy savings, convenience, and ease of installation.

Maestro Wireless dimmers and switches use Lutron patented Clear Connect RF Technology, which enables wireless communication with Radio Powr Savr sensors and Pico wireless controls for light control and general switched loads.

Features
- The Maestro Wireless solution provides dimming/switching of multiple load types, occupancy/vacancy sensing, daylight harvesting, and high-end trim.
- Lutron patented Clear Connect RF Technology works through walls and floors.
- Incorporates advanced features such as fade ON/fade OFF, high-end trim, and rapid full-ON.
- Controls include Front Accessible Service Switch (FASS) for safe lamp replacement.
- Two-wire dimmers and switches available for retrofit applications.
- Power failure memory: If power is interrupted, the control will return to its previously set level prior to interruption.

2 BAA-compliant model numbers available. Add a “U” prefix to the model number. For a complete list of BAA/TAA compliant products please visit our website at Lutron.com/BAA and select “Download BAA Product List.”
3 Clamshell packaging. Available in WH only.
4 Product for Canada.
Ganging and Derating

When combining controls in the same wallbox, derating is required (see Load Type and Capacity tables). Only MRF2-8ANS controls have fins that need to be removed for multigang installations. No other controls have fins, but they must still be derated in multigang installations.

Note: do not mix ELV and MLV load types on a single control.

1 Dimmer Load Type:
- MRF2-6ND-120 is designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only. Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TV1) and legacy interfaces Hi-Power 2•4•6 Boosters (HP-2, HP-4, HP-6).
- MRF2-6MLV and MRF2-10D-120 are designed for use with permanently-installed incandescent, magnetic low-voltage, or tungsten halogen only.
- MRF2-6ELV is designed for use with permanently-installed electronic low-voltage, incandescent, or tungsten/halogen only. Do not install dimmers to control receptacles or motor-operated appliances.
- MRF2-F6AN-DV is designed for use with permanently installed 3-wire line voltage control fluorescent ballasts or LED drivers only (Hi-lume, Hi-lume Compact SE, Eco-10, and EcoSystem). Can control Power Modules (PHPM-PA-DV, PHPM-3F-DV-WH, PHPM-WBX-DV-WH, and GRX-TV1).
- MRF2-6CL is designed for use with permanently-installed incandescent, CFL, LED, magnetic low-voltage, or tungsten halogen only.

2 Low-Voltage Applications:
- Use MRF2-6ND-120, MRF2-6MLV, MRF2-6CL, and MRF2-10D-120 with magnetic (core and coil) low-voltage transformers only. Not for use with electronic (solid-state) low-voltage transformers.
- Use MRF2-6ELV with electronic (solid-state) low-voltage transformers only. Operation of a low-voltage circuit with lamps inoperative or removed may result in transformer overheating and premature failure. Lutron strongly recommends the following:
  - Do not operate low-voltage circuits without operative lamps in place.
  - Replace burned-out lamps as quickly as possible.
  - Use transformers that incorporate thermal protection or fused transformer primary windings to prevent transformer failure due to overcurrent.
- See Application Note #559 for dimming low voltage LEDs.

3 BAA-compliant model numbers available. Add a "U" prefix to the model number. For a complete list of BAA/TAA compliant products please visit our website at Lutron.com/BAA and select “Download BAA Product List”.

</tr>
</tbody>
</table>

**Maximum Load**

| Total MLV Wattage | 450 W / 600 VA | 400 W / 500 VA | 300 W / 400 VA |

**Example**
If a dimmer is installed in location “B” above and there are two 24 W CFL bulbs installed (Total CFL Wattage = 48 W), you may add up to 300 W of incandescent or halogen lighting.
# Maestro Wireless Switches

## Models Available

### Switches

**Lighting and motor loads**

- **MRF2-6ANS-XX**
  - 6 A Lighting/3 A Fan (1/10 HP motor), Electronic Switch 120 V~

- **MRF2-8ANS-120-XX**
  - 8 A Lighting, 5.8 A Fan (1/4 HP motor), Spec-Grade Electronic Switch 120 V~

- **MRF2-8S-DV-XX**
  - 8 A Lighting, 3 A Fan (1/10 HP motor, 120 V~ only), Spec-Grade Electronic Switch 120–277 V~, no neutral wire required

### Companion Switches

**Claro Gloss Finishes**

- **MA-AS-XX**
  - Companion Switch 120 V~

- **MA-AS-277-XX**
  - Companion Switch 277 V~

**Satin Colors Satin Finishes**

- **MSC-AS-XX**
  - Companion Switch 120 V~

- **MSC-AS-277-XX**
  - Companion Switch 277 V~

### NOTE:

- “XX” in the model number represents color/finish code.
- Neutral wire required
- BAA-compliant model numbers available. Add a “U” prefix to the model number For a complete list of BAA/TAA compliant products please visit our website at Lutron.com/BAA and select “Download BAA Product List”.
- May require LUT-MLC (included with MRF2-8S-DV models) to ensure proper function with low-wattage load types. See page 12 for details.

1 Switch Load Type:
- MRF2-8ANS-120 is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/4 HP (5.8 A).
- MRF2-6ANS is designed for use with permanently-installed lighting loads and with fan motor loads up to 1/10 HP (3 A).
- MRF2-8S-DV is designed for use with permanently-installed lighting loads and fan motor loads up to 1/10 HP (3 A, 120 V~ only).

2 For loads larger than 8 A (120 V~), the MRF2-8ANS-120 switch can be used with the PHPM-SW-DV-WH power booster.

3 The LUT-MLC ensures proper function with low-wattage fluorescent, CFL, and LED load types. See page 12 for details.

4 Maximum load for double-gang application is 8 A. Triple-gang application derates maximum load to 7 A.

5 BAA-compliant model numbers available. Add a “U” prefix to the model number. For a complete list of BAA/TAA compliant products please visit our website at Lutron.com/BAA and select “Download BAA Product List”.

Specifications

Regulatory Approvals

- UL® Listed.
- cUL Listed (MRF2-6CL only).
- CSA Certified (except for MRF2-6CL).
- FCC Approved. Complies with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
- Industry Canada Certified.

Power

Operating voltage:
- 120 V~ 50/60 Hz (all models)
- 277 V~ 50/60 Hz (MRF2-8S-DV, MRF2-F6AN-DV)

Key Design Features

Dimmers

- On a single-tap, lights fade UP or DOWN.
- On a double-tap, lights go to full ON.
- When ON, press and hold to engage 20-second fade to OFF.
- Light levels can be fine-tuned by pressing and holding the dimming rocker until the desired light level is reached.
- Two-wire dimmers available.

Switches

- On a single-tap, lights turn ON or OFF.
- Two-wire switches available.

All RF Local Controls

- Tested to withstand electrostatic discharge without damage or memory loss, in accordance with IEC 61000-4-2.
- Tested to withstand surge voltages without damage or loss of operation, in accordance with IEEE C62.41-1991 Recommended Practice on Surge Voltages in Low-Voltage AC Power Circuits.
- Controls always operate locally and do not require system control.
- Power failure memory: should power be interrupted, the control will return to its previously-set level prior to the interruption when power is restored.
- Uses conventional 3-way and 4-way wiring.
- Multiple location control from Dimmer/Switch and up to nine Companion Dimmers/Switches.
- Use Lutron Designer (Claro and Satin Colors) wallplates or designer-style wallplates from other manufacturers. Wallplates are sold separately.
- Lutron Claro and Satin Colors wallplates snap on with no visible means of attachment.
- Requires a one-gang U.S. wallbox; 3½ in (89 mm) deep recommended, 2¼ in (57 mm) deep minimum.
- Green indicator lights.

System Communications and Capacity

- Maestro Wireless controls communicate with the Pico wireless controls and Radio Power Savr sensors through radio frequency (RF).
- Maestro Wireless local controls must be located within 60 ft (18 m) line-of-sight or 30 ft (9 m) through walls, of Radio Power Savr sensors.
- Maestro Wireless local controls must be located within 100 ft (30 m) line-of-sight or 30 ft (9 m) through walls, of a Pico wireless control.
- Up to ten Maestro Wireless controls can be configured to work together.

Environment

- Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0%–90% humidity, non-condensing. Indoor use only.
Dimensions
All dimensions are shown as: in (mm)

Operation

**Dimmer**

- **Status LEDs**: Indicate light level; glow softly as night light when light is OFF.
- **Dimming Rocker**: Press to brighten or dim.
- **Tapswitch**: Tap to turn ON/OFF; double-tap to go to full ON.

**Switch**

- **Status LED**: Indicates load status; glows softly as night light when light is OFF.
- **Tapswitch**: Tap to turn ON/OFF.

**FASS Front Accessible Service Switch**

**Important Notice**: To service load, remove power by pulling the FASS out completely on either the Dimmer/Switch or Companion Dimmer/Switch. After servicing load, push the FASS back in fully to restore power to the control.
When using controls in single location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

Up to nine Maestro Companion Dimmers may be connected to the Maestro Wireless Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).
1 When using controls in single location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.

2 Up to nine Maestro Companion Dimmers / Switches may be connected to the Maestro Wireless Dimmer / Switch. Total blue terminal wire length may be up to 250 ft (76 m).

3 Neutral-wire Dimmers / Switches must be connected on the Load side of a multi-location installation.

---

**Wiring Diagrams** (continued)

**Single Location Dimmer/Switch Installation with Neutral**

Wiring Diagrams (continued)

Single Location Switch Installation with LUT-MLC
MRF2-8S-DV

Multi-Location Switch Installation with LUT-MLC
MRF2-8S-DV with MA-AS / MA-AS-277 or MSC-AS / MSC-AS-277

*Optional Procedure:
Using LUT-MLC with MRF2-8S-DV-XX
1. Install MRF2-8S-DV-XX first without LUT-MLC to see if required. Check for problems with load.
2. Problems can occur when low-wattage loads are used (< 40 W).
3. Watch for flickering loads when dimmer is in electronic OFF state.
4. If required, LUT-MLC can be installed between switched hot and neutral in wallbox if neutral is present, or in any fixture on the switched circuit.

1 A LUT-MLC ensures proper function when low-wattage fluorescent, CFL, or LED loads are used. Install the LUT-MLC inside a load fixture or in a separate J-box within the circuit.
2 When using controls in single location installations, tighten the blue terminal without any wires attached. Do not connect the blue terminal to any other wiring or to ground.
3 Up to nine Maestro Companion Switches may be connected to the Maestro Wireless Switch. Total blue terminal wire length may be up to 250 ft (76 m).
When using controls in single location installations, tighten the blue terminal. Do not connect the blue terminal to any other wiring or to ground.

Up to nine Maestro Companion Dimmers may be connected to the Maestro Wireless Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).

Neutral-wire Dimmers must be connected on the Load side of a multi-location installation.

Requires MA-R / MA-R-277 / MSC-AD / MSC-AD-277 for 277 V applications.

---

1 When using controls in single location installations, tighten the blue terminal. Do not connect the blue terminal to any other wiring or to ground.
2 Up to nine Maestro Companion Dimmers may be connected to the Maestro Wireless Dimmer. Total blue terminal wire length may be up to 250 ft (76 m).
3 Neutral-wire Dimmers must be connected on the Load side of a multi-location installation.
4 Requires MA-R / MSC-AD for 120 V applications, and MA-R-277 / MSC-AD-277 for 277 V applications.

- Stainless Steel (SS)

**Due to printing limitations, colors and finishes shown cannot be guaranteed to perfectly match actual product colors.**

**Color chip keychains are available for more precise color matching:**
- Gloss Finishes: DG-CK-1
- Satin Finishes: SC-CK-1

For the latest color offerings please see our website: [http://www.lutron.com/satincolors](http://www.lutron.com/satincolors)

When using Stainless Steel wallplates, it is recommended that you order the dimmer/switch in Midnight (MN).
