

Products Suitable for Use with Lutron® Dimmable Receptacles

Overview

A dimmable Lutron® receptacle is available in two models: DDTR (Duplex), and HDTR (Half). Model DDTR (Duplex) allows both outlets to be used for dimming and model HDTR (Half) allows the top outlet to be used for dimming while the bottom outlet is a standard receptacle. These dimmable receptacles provide a solution for dimming table/floor lamps directly through a receptacle in both residential and commercial applications. Both DDTR and HDTR are UL® Listed to be controlled by UL® Listed Lutron® dimmers and Lighting Control Systems.

This guide identifies products that are suitable for use with Lutron® dimmable receptacles.

Products Suitable for Use with Lutron® Dimmable Receptacles

Dimmable receptacles and replacement plugs are UL® Listed Special Use Connectors suitable for use with the following Lutron® products:

- Ariadni® Dimmers
