

Any Fixture

Can Now Include Connected Lighting Control

Introducing Vive Integral Fixture Control

RF only

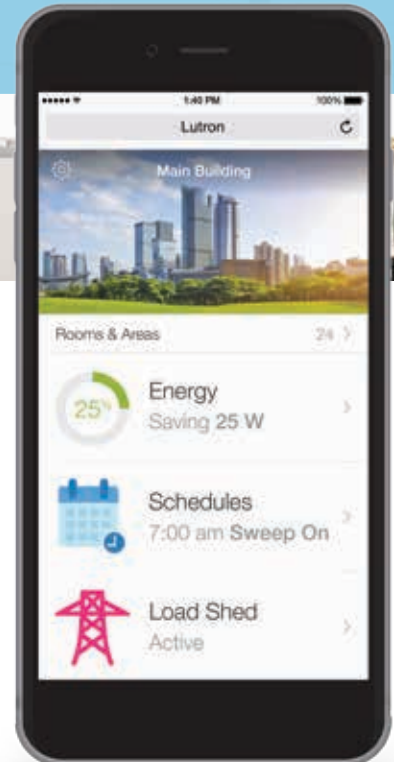

Can be mounted
above ceiling

RF with sensor

Individual or grouped

- XCT occupancy sensing
no false on/off
- Lutron Clear Connect
ultra-reliable RF
- Daylight sensor
at the fixture level

- Simple** — Designing a system is as easy as counting fixtures. Adjust settings any time with Vive software. Start small and expand/integrate when ready.
- Smart** — RF only or RF with sensor options ensure the right level of Vive-enabled control for every fixture.
- Reliable** — Clear Connect wireless operates at an uncongested radio frequency (434MHz).
