

Lutron hospitality shading solutions

Beautiful. Comfortable. Innovative

Lutron hospitality shading solutions

Embrace the power of daylight

Daylight has the power to change a room—to brighten, warm, and even inspire. Lutron's automated shading solutions unlock all this potential with the simple touch of a button. Invite your guests to experience the perfect light, with Lutron shading solutions.

Mandarin Oriental, New York, New York, U.S.A.

Transform the guest experience

Your guests expect style, comfort, and elegance. Lutron automated shading and drapery systems, available in a broad offering of styles and fabrics, provide the quintessential hospitality experience.

Ambiance & style

- Create a welcoming atmosphere
- Impress your guests with intuitive, elegant, one-touch operation

Convenience & comfort

- Pre-programmed settings can reflect time of day, typical activities, and personal preference
- Provide privacy, reduce glare, or block daylight
- Bedside keypads enhance the guest experience

Energy savings & reduced costs

- Minimize heat loss and solar heat gain
- Integrate with occupancy sensors that automatically adjust shades when guests leave or enter the room

Architectural design & engineering excellence

- Provide a customized solution to accommodate the most unique and innovative spaces
- Work with Lutron's support teams to find an elegant solution for atriums, high ceilings, large or multi-window façades, or hard-to-reach windows

Lutron hospitality shading solutions

World-class quality and innovative design

Lutron has a 50-year legacy of lighting control innovation, and we bring that same passion and dedication to advanced shading systems.

Reliable, low-voltage performance

- Ultra-quiet motors and smooth performance enhance the guest experience
- Intelligent Hembar Alignment™ (IHA) ensures that shades always move in perfect unison
- Memory presets are retained even if power is lost and restored
- Low voltage (24V DC) wiring offers greater flexibility, and makes retrofit projects easier

Smart, flexible technology

- Wireless solutions minimize installation cost—ideal for retrofit applications
- Lutron ClearConnect® wireless technology ensures reliable, flawless, wireless communication

Stylish, intuitive control

- Range of colors and finishes complement the decor of guest rooms and public areas
- Wired and wireless controllers (keypads) are available, depending on your needs

Beautiful styles

All Lutron motorized shades operate virtually silently, and move in unison to ensure precise alignment.

Roller shades

Suggested uses: guest rooms, hotel lobbies, conference rooms, restaurants, ballrooms

- Lutron technology allows control of many different roll widths and fabrics from just one drive—ideal for multi-story windows and curtain walls
- Cable-guided and tensioned styles accommodate angled and skylight windows
- Sheer, translucent, and blackout opacities suit any light-level requirement
- Wire-free, battery-powered shades install easily in retrofit applications

Curtain track systems

Suggested uses: guest rooms, restaurants, lobbies

- Straight, curved, spliced, and tandem track systems will complement any façade
- Pinch pleat and ripplefold fabric styles, in varying fullness, lend a soft touch
- Panels can be fabricated from Lutron's offering or customer's own material
- Optional manual-open feature prevents damage to the product if a guest attempts to open the drape manually, and allows guests to open drapes during a power outage

Roman shades

Suggested uses: guest rooms or spas

- Four pleat styles—flat, hobbled, knife, and casual—offer variety
- Lutron's revolutionary Cord Eliminating Roman Uptake System (CERUS) replaces Roman shades' lift cords to create safer shades
- Soft fabrics and woven woods are available in Lutron's fabric collections; customer's own material can also be used

Lutron hospitality shading solutions

Exceptional fabrics

Our design-focused fabric collections unite quality with variety for motorized shades that deliver outstanding performance and exceptional aesthetics. Choose from a range of colors, patterns, and textures, including environmentally-friendly as well as fire-rated fabrics.

The Gallery Collection

Roller Shades

- Fashion fabrics for roller shades
- Fashion fabrics in rich colors and chic patterns

The Classico™ Collection

Roller and Tensioned Shades

- Performance fabrics for roller, tensioned, and cable-guided shades
- Cut glare, save energy, and preserve the view with a classic neutral palette

The Avant Collection®

Curtains and Roman Shades

- Pinch pleat or ripplefold draperies made with soft or sheer fabrics
- Choose from four classic pleat styles for Roman shades in soft fabrics or woven woods, all with cordless operation for smooth, reliable performance

The Euro Collection with Coulisse

Roller Shades

- Edgy, fashion-forward roller fabrics
- Fashionable fabrics that filter sunlight while enhancing the room's décor

Customer's Own Material

Lutron offer Customer's Own Material (COM) options—you have the freedom to create your own design with reliable Lutron automation.

The flexibility you need

Find the perfect shading solution to suit your project, from new construction to renovation to soft renovation. Lutron makes it easy and affordable to get the results you expect.

Seamless integration

- Shades work with Lutron lighting controls and systems, so you get a “one-stop-shop” experience with comprehensive project management and support
- Lutron products integrate with third-party systems (building management, lighting, tablets, guest room energy management systems, etc.)

Delivery & installation

- We provide you with the complete solution, whether direct from our factory or through one of our certified fabricators around the world

Renovation & retrofit

- Our battery-powered solutions are perfect for retrofit applications where running wire is not possible or convenient
- Patent-pending power technology yields a 3-5 year* battery life, the longest battery life in the industry

* Batteries will last 3-5 years on a 3' x 5' light filtering shade, assuming the shade moves up and down twice a day, 365 days a year. That means the shade has the potential to move thousands of times on a single set of batteries.
Note: For maximum battery life we recommend Alkaline D and Lithium AA batteries.
