Extron Touchpanel Integration

Simple, responsive control for an enhanced smart-building solution

Engineers, designers, and integrators can now specify a solution that makes it easy to combine advanced lighting control with features such as room booking and A/V control of monitors, screens, and other equipment — and access it from the convenience of their Extron touchpanel.

How it works

**Essential system functions all available from a single touchpanel interface**
Easily adjust light levels, zones, scenes, and A/V control to enhance the user experience.

**Vive integration is completely seamless, with no complex interface**
Using just the Vive API and the Extron touchpanel, the system integration just works.

**Simple-to-design touchpanel controls**
The Extron touchpanel communicates to the Vive wireless hub, which communicates to the Vive load controls for a responsive, reliable smart-building experience.
The Lutron Vive Wireless system is a simple, flexible, scalable lighting control solution, built on a proven wireless platform, for new and existing buildings. [lutron.com/vive](http://lutron.com/vive)

**The Solution**

The Lutron Vive Wireless system is a simple, flexible, scalable lighting control solution, built on a proven wireless platform, for new and existing buildings. [lutron.com/vive](http://lutron.com/vive)

**Vive — Work Smarter, Not Harder**

- **Save time.**
  Up to 70% faster than wired control solutions — means shorter timelines and lower costs. Controls install quickly, and you can do the work overnight, one room at a time, with no rewiring necessary.

- **Meet code. Meet your needs.**
  Vive has simple, code-compliant solutions for your space or building. Put the right controls in the appropriate office, and connect them all with just one system.

- **Proven technology — it just works.**
  Not all wireless is the same — millions of Lutron wireless systems have been successfully installed in workspaces, offices, and business parks around the world all backed by Lutron industry-leading quality and support.

- **Solve problems. Adjust effortlessly.**
  Simple software, available on your phone, allows you to reprogram or adjust settings from anywhere. And Vive evolves with you, allowing you to make changes in your wireless setup without rewiring, so you can quickly adapt to new guidelines and needs.

- **Easy to grow. Simple to manage.**
  With Vive, you can start with one office and add other spaces over time, without any rewiring required. With the Vive app, facilities teams can make changes to lighting, see alerts on low battery warnings, and modify their spaces without having to call the manufacturer.
