

About Lutron

In 1961, Lutron sold its first newly invented solid-state light dimmer – on the way to becoming the world leader in the design and manufacture of light control technology. Now working in over 80 countries, we're well able to meet any challenge – cultural, geographical or technical. A UK-based company may be working on an MDU project in Spain with an interior designer in Paris. Lutron's proven global service and support accommodates local standards, codes and factors, ensuring throughout your system arrives on schedule.

Lutron has registered over 2,700 patents worldwide, and for over 50 years, we have met and exceeded the highest quality standards. Every one of our products is tested before it leaves the factory.

And, as we manufacture more than 15,000 products, there is a light control solution to fit every requirement and budget.

Multi Dwelling Unit Solutions

High quality solutions. Innovative technology. Outstanding service

Any project. Any budget. Anywhere.

Lutron offers the widest range of innovative solutions for lighting and blind control. So, whatever the budget, Lutron has the solution to enhance the property. From a simple control for a single light or blind, an integrated control for a room, or a sophisticated system to control every light and blind, there is a Lutron solution that will appeal to any lifestyle.

Why developers choose to work with Lutron.

Lutron is the brand leader in lighting and blind control – ever since we invented the first solid-state dimmer in 1959. More than 50 years later we are still dedicated to innovation: today, we own more than 2700 patents.

We are committed to the highest quality and reliability. We performance-test 100% of our products before we ship them, and back this with an eight-year warranty on our most sophisticated systems.

We have different solutions at different price points so you can offer your customers good/better/best options.

Lutron offers great upsell and upgrade opportunities.

Motorised blinds are a perfect upgrade that you can offer your customers when they move in. Our new battery-powered blinds can easily be installed without having to run any wires to the windows.

We are the leader in LED lighting control.

Our LED Control Center of Excellence (www.lutron.com/led) is an example of how we help customers find the right solution for controlling LED lighting. When you use LED drivers by Lutron, you get guaranteed compatibility and performance.

Above all, our first principle is, quite simply: **“Take Care of the Customer.”**

Some of our MDU projects

Lutron is a global company and has been operating for more than 50 years.

Recent MDU Projects include the following:

- Akamas Bay Villas, Pafos, Cyprus
- NEO Bankside, London, UK
- Beacon Court, Dublin, Ireland
- California Golf Resort, Bouskoura, and Eden Island, Bouznika, Morocco
- Chelsea Bridge Wharf, London, UK
- Dharmawangsa Residences, Jakarta, Indonesia
- Fitzroy Place, London, UK
- Oceana & Tiara Residences, Dubai, U.A.E.
- Olympic Residence, Limassol, Cyprus
- One Hyde Park, London, UK
- 100 Knightsbridge, London, UK
- Phillimore Square, London, UK
- Residencial Hoyo 10, Madrid, and Condalo de Camojan, Marbella, Spain
- The Lily, Hongkong
- The Marq on Paterson Hill, Singapore
- The Pier @ Robertson, Singapore

Lutron is the market leader in the field of light controls and control systems

Year after year we are recognised in industry brand preference studies as having the most desirable products in the categories of light and blind controls. Lutron is one of the first companies to achieve ISO 9001 in the electrical industry. Our quality is further evidenced by the many installations from the late 60s and 70s that are still operating properly to this day.

Our Prestigious Projects brochure* details further examples of our work across six continents.
