

## **Lutron Releases Version 5.0 of RadioRA® 2 Design and Programming Software**

**Coopersburg, PA (September 7, 2011)** — Light control manufacturer Lutron Electronics is pleased to announce the release of version 5.0 of the RadioRA 2 Design and Programming Software. This latest release includes support of new products, like Sivoia® QS wireless cellular shades, as well as simplified programming techniques.

RadioRA 2 offers convenient, one-button control of lights, shades, temperature, and small appliances, offering enhanced energy savings throughout the home. Pressing the goodnight button, for example, could turn off all interior lights, lower all the shades, turn off energy-hogging devices like AV equipment, monitors and plug-in fans, plus adjust the temperature by five degrees. The system controls 60%\* or more of a home's energy use, including lights, shades, stand-by power from small appliances and temperature.

The newest version of the RadioRA 2 design and programming software, version 5.0, offers:

- device activation using serial numbers
- support for the low-light feature on Radio Powr Savr™ occupancy sensors
- the ability to disable/enable occupancy sensors and the “Green” button by time of day
- remote limit setting for shades
- enhanced bill of materials report with filtering capability
- support for the new Pico™ wireless controls
- support for the new Radio Powr Savr sensors
- support for the new Sivoia QS wireless cellular shades
- global scene programming (available in the Inclusive version of the software)

RadioRA 2 is scalable to 200 devices, operates via Lutron's Clear Connect™ wireless, RF technology, and can be easily installed in any home. It can also be controlled from keypads and mobile devices, including the Apple® iPad™ and Android devices.

The software is downloadable by qualified installers via <http://resi.lutron.com/radiora2>

### **About Lutron Electronics ([www.lutron.com](http://www.lutron.com))**

Lutron Electronics, headquartered in Coopersburg, Pennsylvania, designs and manufactures energy-saving lighting controls, automated window treatments and appliance modules for both residential and commercial applications. Its innovative, intuitive products can be used to control everything from a single light, to every light, shade and even stand-by power in a home or commercial building. Lutron products make any space more versatile, while enhancing ambiance, comfort and productivity. They also save energy and make light bulbs last longer, making them an eco-friendly addition to the home and workplace. Founded in 1961, Lutron estimates that the installed base of its products saves the nation nearly 10 billion kWh of electricity, or approximately \$1 billion in utility costs per year. Lutron manufactures more than 16,000 energy-saving products, sold in more than 100 countries around the world.
