

Lutron Quantum™ Total Light Management System Means Big Savings for Commercial Buildings

—Available with Hyperion™ Solar Adaptive Shading, Green Glance™ Tracking Software—

Lutron Electronics Co., Inc. enters the next phase of total light management with the latest version of its signature commercial lighting control system, Quantum. An ideal solution for new construction or renovations, Quantum is a lighting control system that has the ability to manage total light levels in response to available daylight.

Using Quantum can lower electric light usage every day. Building owners can realize lower maintenance and operating costs for a potential lighting energy savings of about 60% or more.

Quantum automatically dims or switches all electric lighting and can also control daylight using automated window shades. Features include **Hyperion™** Solar Adaptive Shading and the **Green Glance™** program. Hyperion is an automated shading system that adjusts shades throughout the day based on the sun's position, maximizing available daylight in a space while minimizing glare and solar heat gain. Green Glance is software for the Quantum solution that displays the lighting energy savings of a building.

Quantum offers incredible flexibility. Lighting and shading zones can be re-configured without rewiring, and the system is scalable from small, stand-alone spaces to whole floors, an entire building or a campus.

Currently, Quantum is achieving a 70% savings in lighting electricity use at The New York Times Company headquarters in New York City, a 66% savings at the Bently Reserve Building in San Francisco, and significant energy savings for other LEED® Certified Platinum projects, including SAP America Inc. in Newtown Square, PA, Johnson Controls Inc. in Milwaukee, WI, and Access Living in Chicago, IL.

About Lutron Electronics Co., Inc.

Lutron Electronics Co., Inc., headquartered in Coopersburg, Pa., is the world leader in the design and manufacture of light control solutions for both residential and commercial applications. The company offers a wide variety of lighting controls, whole-home and whole-building dimming systems, and electronically controlled shading solutions. Lutron products save energy, increase space flexibility, and enhance occupant comfort and productivity, making them essential to any home and building. For more information, view www.lutron.com.
