

Lutron Launches New Design Tool

—Lutron Designer Software Makes System Design Easier—

Coopersburg, PA (January 18, 2011) – Lutron Electronics Co., Inc. makes it easy to design light control systems with the debut of the new Lutron Designer.

Lutron Designer is currently available for manufacturer representatives on DIMs, and allows users of the software to:

- Design light control systems with GRAFIK Eye QS, Energi Savr Node modules, Sivoia QS Shades, seeTouch QS controls, Radio Powr Savr sensors, dimming ballasts and other devices for simple single area projects to complex multiple floor applications
- Generate a one-line diagrams that can be exported in AutoCAD DXF file format
- Develop a project bill of materials with option to add line items and export to quotation tool
- Provide detailed engraving requirements and product color selection
- Review outputs prior to printing or exporting documents in the report center

“Manufacturer representatives and dealers have been anxiously waiting the release of this software, which takes you beyond design through the submittal process,” says Jason Renner, Applications Sales Manager for Lutron. “The advanced features and flexibility of the software combine to deliver better and more detailed lighting control designs and results in reduced efforts as projects proceed through design and construction.”

Lutron manufacturer representatives and dealers can download the new Lutron Designer by visiting DIMs – www.lutron.com/dims. For access to DIMs, please contact your local Lutron sales representative or Lutron customer service at 1.888.LUTRON1. There is a Lutron Designer user guide also on DIMs available for download and access to sign up for a training webinar.

About Lutron Electronics (www.lutron.com)

Lutron Electronics, headquartered in Coopersburg, Pennsylvania, designs and manufactures energy-saving lighting controls, automated window treatments and appliance modules for both residential and commercial applications. Its innovative, intuitive products can be used to control everything from a single light, to every light, shade and even stand-by power in a home or commercial building. Lutron products make any space more versatile, while enhancing ambiance, comfort and productivity. They also save energy and make light bulbs last longer, making them an eco-friendly addition to the home and workplace. Founded in 1961, Lutron estimates that the installed base of its products saves the nation nearly 10 billion kWh of electricity, or approximately \$1 billion in utility costs per year. Lutron manufactures more than 16,000 energy-saving products, sold in more than 100 countries around the world.
